Table of Content

7th South American International Conference on Industrial Engineering and Operations Management

Panama City, Panama, August 4-6, 2026

ID	Title
7	Joint Optimization of Manufacturing Operations under Non-Homogeneous Deterioration
18	Improvement of Equipment Availability Through Focused Improvement and Autonomous Maintenance in a Plastic Preform Manufacturing Company
20	Improvement Model to Reduce Lead Times for Complete Deliveries in a Print Shop Applying SMED, Preventive Maintenance, and SW
21	Model for Improving Availability through TPM and SMED in a Plastic Packaging Company
22	Cultivating Probabilistic Thinking: An Experiential Simulation of Process Variation and Tampering
23	Toward Explainable Transfer Learning for Cross-Material Surface Roughness Prediction in Machining
28	Characterization of Operations Management in Servuction Systems from a Sectorial Approach: Port Services Case Study
29	AN INTEGRATED FRAMEWORK FOR LAST-MILE DELIVERY OPTIMIZATION USING REINFORCEMENT LEARNING AND SOCIAL MEDIA-BASED TRAFFIC PREDICTION IN UNDERDEVELOPED MEGACITIES
31	Operational Characterization of Multi-Stop Air Cargo Flights: A Data-Driven Analysis of a Mexican Dedicated Cargo Carrier
32	A Meta Synthesis of Key Behavioral Indicators Aligned with Shingo Model Principles and Industry 5.0 Pillars
34	Design of a pilot plant for the manufacture of Organic Semiconductor Films in Ecuador
35	Techno-Economic and Environmental Assessment of Alternative Marine Fuel Adoption in Panama Canal Operations
36	Towards Agriculture 4.0 in Open Farming - EDEN Project for Hop Cultivation
37	Integrated Crane Maintenance Planning with Berth Allocation, Quay Crane Assignment, and Emissions Reduction Considerations
39	The Panama Canal Drought and Shifts in U.S.–China Grain Flows
49	Temporal Analysis of Urban Sprawl Growth in the Metropolitan Area of Panama Using Google Open Buildings 2.5D Data
51	Process Capability Analysis of Weight Variability in Portioned Beef Production: A Colombian Case Study

53	Benchmarking Deep Learning Backbones for Real-Time Vehicle Classification of Panamanian Urban Traffic
56	Shocks and Consumer Food Prices: AComputational Design of Experiments Analysis in Panama (2017–2025)
71	An AI-Enabled Digital Twin Framework for Safe, Scene-Aware Lunar Rover Autonomy
73	AI-Enabled Digital Twins for Low-Carbon Logistics Network Planning: A Simulation-Based Optimization Framework
82	Predictive Planetary Robotics: An AI-Driven Digital Twin Framework for Resilient Lunar Surface Operations
86	The Contextual Adjustment Mechanism (CAM): ADual-Layer Framework for Contextual Regulation in Socio-Institutional Service Systems
88	Distance, Shielding, and Model-Derived Exposure Times in Radiopharmaceutical Handling: An OpenGATE Monte Carlo Study
89	Digitalization of Preventive Maintenance Management for Plastic Injection Molds
90	APartition-Based Scheduling Model for the Panama Canal
91	AZero Trust-Oriented Cloud Architecture for Securing Electronic Health Rec-ords: APilot Implementation with OpenEMR and DoS Stress Testing
92	An Interpretable Software Framework for Standardizing Multi-Vendor Biomedical Equipment Maintenance Procedures
93	Production Scheduling in the Fruit-Based Beverage Juice Industry using System Dynamics
94	Governing or Absorbing Supplier ESG Risk? Discipline, Lock-In, and Portfolio Compensation in Buyer Sourcing
95	ADesign Science Research Approach to Supporting Operational Management in Early-Stage MSMEs
96	AChromatic Feature-Based Computer Vision Workflow for Neonatal Jaundice Screening from Digital Images
97	Improvement Proposal to Reduce Preventive Maintenance Time of Electric Hoists Using 5S and Standardized Work
98	Keeping Pace with Growth: Vehicle Counting Stations and Population Trends in Texas (2012–2021)
99	Supply Chain Due Diligence, game theory, sustainability, supply chain compliance, sustainability standard
101	End-of-Arm Tooling Adaptation for Variable-Profile Distribution: Engineering a Beverage Logistics Solution
102	AGate-Based Release Management Framework for Multi-Site Robotic System Deployment

103	A Phased Validation and Rollout Framework for Multi-Site Autonomous Warehouse Robotic Systems: From Single-Site Validation to Network Scale
104	A Framework for Vision-Based Obstruction Detection in High-Density Robotic Warehouse Systems: Design Principles and Deployment Outcomes
117	Governing the Invisible: A Process, Power, and Practice Framework for Responsible AI in Healthcare
120	Data-Driven Decision Support for Central Bank Operations: Machine Learning and Structural Break Analysis for Inflation Forecasting—A Bolivian Case Study (1980–2026)
122	Improving Productivity in a Small Footwear Manufacturing Business Through Work Standardization and DDMRP
126	Concurso de simulación
127	Predicting Transit and Waiting Times in the Panama Canal Using Machine Learning Modeling
128	The AI Budget Paradox: A Tiered Access and Proficiency Framework for Sustainable Enterprise AI Adoption
129	The Moderating Role of Brand Love on the Relationship of Brand Loyalty and Brand Authenticity, Brand Personality, and Brand Engagement: Using Structural Equation Modelling in Fashion Industry
130	Digital Banking Agility and Customer Digital Literacy on Reuse Intention: A Serial Mediation of Trust, Customer Experience, and Satisfaction Among Indonesian State-Owned Bank (Himbara) Customers
131	Technological Immersion and Purchase Intention in Live Commerce: The Mediating Roles of Flow Experience and Utilitarian Value
133	Customer Experience as a Strategic Driver of Buying Intention: The Influence of Service Quality and Brand Equity in CHAGEE's Market Context
134	Artificial Intelligence Integration in Architecture, Engineering, and Construction (AEC) Education: A Review
135	An AI-Assisted Multimodal Framework For Hepatocellular Carcinoma Prediction And Tumor Grading Using ANP Based Biomarker Prioritization And MRI/CT Image Analysis
136	SORTCYCLE: Intelligent Automation System for the Sustainable Management of Solid Waste in Panama
138	Mapping Engineering Curricula based on the Semiconductor Value Chain: A Portfolio-Level Coverage Analysis in an Emerging Economy
139	The Influence of Wind on Corn Supply Chain at Panama
140	Prediction of CO_2 emissions in ships in transit and arrival at the Panama Canal using machine learning models and H3 spatial indexing
143	Supply Chain Robustness: A Conceptual Framework for Semiconductors

145	Translating AI Exposure Indices into a Work-based Training Framework for Supply Chain and Maritime Industry
161	A Comprehensive Framework Integrating Cognitive Engineering, Systems Engineering, and Artificial Intelligence with Virtual Simulation to Cultivate Engineering Leadership Skills
162	Energy Communities in Mexico: Challenges, Opportunities and a Governance Model for the Energy Transition
163	The Role of IS Performance in Consolidated Financial Reporting and Internal Control
164	From Efficiency to Resilience in Maritime Transport Systems: A MAPA-Based Framework for Explaining Why the Freight Rate Is No Longer the Cost of Transportation
165	Dynamic Distance Tracking Using Ultrasonic Sensor, MicroBlaze FPGA, and Node-RED for IoT Applications in Industry 4.0
167	Application of Lean Warehousing Tools to Improve OTIF in an Automotive Company
168	Design of a Hybrid Quantum-Classical Model for Encrypted Data Multiplication to Preserve Security
177	The relationship between an ISO 17025:2017 accredited laboratory and operational performance: A Case of a Perishable Product Export Control Board (PPECB) testing laboratory.
179	Assessment of the Impacts of the Circular Economy in the South African Construction Industry: Professionals' Perspective
180	BARRIERS TO THE ADOPTION OF THE CIRCULAR ECONOMY IN SOUTH AFRICA'S CONSTRUCTION INDUSTRY
181	Pathways to Circular Transformation: Rethinking Construction Industry Practices in Emerging Economies
182	EXPLORING BARRIERS TO THE ADOPTION OF MODERN METHODS OF CONSTRUCTION (MMC) IN THE CONSTRUCTION INDUSTRY: BIBLIOMETRIC ANALYSIS
