## **Biographies**

**Pradeep Suryanarayana Barimar Rao** currently serves as transportation engineering consultant for an infrastructure solution consulting firm. Mr. Rao holds a Bachelors of Engineering in Civil Engineering from National institute of technology, Karnataka and a Master of Science degree in transportation engineering from Auburn University. He is a civil engineering Professional Engineer (PE) with more than 15 years of experience successfully developing, designing, implementing and managing Intelligent Transportation Systems (ITS) projects as part of multi-agency and consultant teams designing and managing freeway management systems, virtual weigh-in-motion systems, truck parking systems, High Occupancy Toll (HOT) and traveler information systems. He is interests are design, planning, modelling and simulation. He is a member of Institute of Transportation Engineers.

**Sheryl Elizabeth Mathew** has recently completed her Master of Technology degree in Marine structures from National Institute of Technology Surathkal, India. She holds a Bachelor of Technology degree in Civil Engineering from National Institute of Technology, Calicut. Her research interests include computational fluid dynamics, simulation and wave hydrodynamics.

**Praveen Suvarna** is a PhD scholar of National Institute of Technology, Karnataka, India. Completed his Masters from National Institute of Technology, Karnataka. His research interests include computational fluid dynamics and wave hydrodynamics. He is member of ACCE, AMIE and IIV.

**Arunakumar Hunasanahally Sathyannarayana** has completed his Master of Technology degree in Marine structures from National Institute of Technology, Karnataka and Bachelor of Engineering in Civil Engineering from National Institute of Engineering, Mysore, India. His research interests include computational fluid dynamics, Wave structure interaction and wave hydrodynamics.

**Dr. Pruthviraj Umesh** currently serves as Assistant Professor in Department of Applied Mechanics and Hydraulics, National Institute of Technology (NITK), Karnataka, India. He did PhD in flow through perforated plates which had extensive CFD analysis and experimental studies using wind tunnel. His Research interest includes wind engineering, GIS, open source product development, Engineering applications in wildlife conservation. He has experience in design and development of open source unmanned systems for civilian applications. He has presented his research work in technical conferences in Netherlands, Oman, Germany, Japan, USA, and Switzerland. He has been mentor for student technical teams which won prizes in National Level competitions. He has guided many Ph. D. scholars and M. Tech students. He is the coordinator for RT Lab of Strength of Materials and coordinator of Computer for System Designs (CSD), NITK, Surathkal. He actively pursues aerial photography, Unmanned Aerial Vehicles (UAV) and Videography.
