

Intelligent Manufacturing. I have over 18 years of experience in Research and Development projects, at the national and EU level.

Aneesh Zutchi has a Doctoral Thesis from Universidade Nova de Lisboa in Digital Business Models using Agent Based Simulations. He lectures on many disciplines related to Operations Research and Management with a core focus on Digital Business, Startups, Modeling, Simulation and Business Strategy. He has work experience in the area of Innovation Management and has led a project on Entrepreneurial Education as part of the Startup Europe Initiative. He is also a mentor for Startups and Entrepreneurs at the European Innovation Academy. He has been involved in Entrepreneurial Education and developed curriculum for students, so that they develop awareness of the fast changing world of digital technologies and groundbreaking Business Models. But more importantly they develop the leadership skills and the creative talent to develop innovative solutions and technologies. He has also been actively researching on topics related to Strategic Management and how to help organizations evolve dynamic organizational structures, coherent strategies, collaborative technologies and motivating work environments. He especially focuses on approaches that promote decentralization, flat organization, open innovation, and collaboration.
