

Suppaitnarm, A., Seffen, K. A., Parks, G. T., & Clarkson, P. J. (2000) Simulated annealing: An alternative approach to true multi objective optimization. *Engineering Optimization*, 33, 59.

Biographies

Abbas Mahmoudabadi, is faculty member at MehrAstan University, Guilan, Iran. He received Ph.D. degree in January 2014 in the field of optimization in Hazmat transportation and received Thesis Dissertation Award from IEOM society in 2015. He has published near 80 journal or international conference papers published in the field of industrial engineering, transportation and traffic safety and e-commerce. He teaches transport and industrial engineering courses and has around 27 years of experiences on traffic and road safety planning in developing countries. He has also strong cooperation with national and international agencies on traffic safety and industrial engineering.

Roozbeh Azizmohammadi is faculty member at Payam Noor University, Tehran, Iran. He received Ph.D. degree in January 2014 in the field of reliability. He has published near 30 journal or international conference papers published in the field of industrial engineering mainly in project management.
