Biography / Biographies

Dr Sagheer Ranjha is a Lecturer at School of Engineering, Swinburne University of Technology, Melbourne, Australia. Also, he is actively involved in research at the Centre for Sustainable Infrastructure. He completed his PhD on rail-transport theme at Swinburne University of Technology Australia in collaboration with Institute of Railway Technology Monash University Australia. Earlier, he completed his masters in Engineering Project Management from University of Manchester UK and BEng in Mechanical Engineering from University of Engineering and Technology Lahore, Pakistan. His research interests include contact mechanics, fatigue and fracture modelling and risk management in transportation infrastructure. Prior to his teaching career as an Assistant Professor at the University of Engineering and Technology, Lahore, he worked in the industry as a Mechanical Engineer. He is a member of Institution of Engineers Australia and the Railway Technical Society of Australasia (RTSA).

Palaneeswaran Ekambaram is an Associate Professor, Course Director for a nested suite of postgraduate Construction and Infrastructure Management courses in the Faculty of Science, Engineering and Technology at Swinburne University of Technology, Australia. He completed BE and ME (Honours) degrees from India and received PhD from the University of Hong Kong. Prior to joining in Swinburne, he served as an academic staff at the University of Hong Kong and City University of Hong Kong. He has published 125+ peer-reviewed research papers and recipient of several prestigious awards/ grants including competitive grants from Australian Research Council and Hong Kong Research Grants Council. He is affiliated with professional institutions such as ASCE, IEEE, ISTE, and PMI.
