BIOGRAPHY

Shahid Ali is a PhD candidate at Centre of Advanced Process Safety (CAPS) in Department of Chemical Engineering at the Universiti Teknologi PETRONAS, Perak, Malaysia. He earned B.Sc in Chemical Engineering from University of Engineering and Technology Peshawar, KPK, Pakistan and M.E in Chemical Engineering from Universiti Malaysia Pahang, Malaysia. He has published journal and conference papers. His research interests include process safety, safety culture, Behavior-based Safety and Hierarchal task analysis.

Azmi Mohd Shariff is currently Professor, Head of Research Center for CO₂ Capture (RCCO₂C), and Head of Centre of Advanced Process Safety (CAPS) at Department of Chemical Engineering, in Universiti Teknologi PETRONAS. Prof. Dr. Azmi Mohd Shariff holds a Bachelor of Science degree in Chemical Engineering from Universiti Teknologi Malaysia, M.Sc degree in Chemical Engineering (Process Integration) from University of Manchester Institute of Science and Technology (UMIST), UK, and PhD from University of LEEDS, UK. He is inventor for Process Hazards Management System and Method, Process Safety Information Management System and Method, and System for Electrical Safety Assessment. Some of numerous successfully completed projects related to process safety are Online At-Risk Behaviour Analysis and Improvement System (E-ARBAIS), Electrical Safety and Operability Review (ELSOR), Quantitative Risk Assessment (QRA) for PETRONAS plants and Review of CIMAH 1996 Regulations to include Process Safety Management for Department of Safety and Health (DOSH), Government of Malaysia.
