BIOGRAPHY

Arian Dhini is a doctoral student in Industrial Engineering, Universitas Indonesia. She earned B.S. in Industrial Engineering from Bandung Institute of Technology with minor in Industrial Management. She also holds master degree in Industrial Engineering from Universitas Indonesia. She has published in some journals and conference papers with topics in Data Mining. Ms Arian Dhini has been involving in some research grants with her supervisor, Prof Isti Surjandari. The most recent one is research theme mapping analysis by using text mining approach. Her research interests include quality engineering, maintenance and reliability, data mining and service engineering. She is a member of ASQ.

Isti Surjandari is currently a Professor in Industrial Engineering, Universitas Indonesia. Prof Surjandari holds bachelor degree from Mechanical Engineering, Universitas Indonesia. After continuing her master degree in Industrial Engineering from Bandung Institute of Technology, she also received master of arts and PhD from Ohio State University, USA. Her research interests area multivariate analysis, quality engineering, service engineering and data mining. She is a member of ASQ and has been invited in some international conferences as a keynote speaker.
