

BIOGRAPHY

Nima Kazemi is currently a PhD candidate at the Department of Mechanical Engineering, Faculty of Engineering, University of Malaya, Kuala Lumpur, Malaysia. He obtained his MSc in Industrial Engineering-System Management and Productivity from Alghadir Higher Education Institution, Iran, and a BSc in Applied Mathematics from University of Semnan, Iran. His current research interests are: Fuzzy Multi-Criteria Decision Making, Fuzzy Mathematical Programming, Learning and Forgetting Theory, and Inventory and Supply Chain Management. His research papers have appeared in several international journals and international conference proceedings.

Ezutah Udoney Olugu is currently working as Senior Lecturer in the Department of Mechanical Engineering at the Faculty of Engineering, University of Malaya, Kuala Lumpur, Malaysia. He obtained his B.Eng in Mechanical and Production Engineering from Nnamdi Azikiwe University, Nigeria, M.Eng in Advanced Manufacturing Technology and PhD in Industrial and Manufacturing Engineering at the Universiti Teknologi Malaysia. He is currently involved in teaching, research and consultancy services at the Center for Product Development and Manufacture, University of Malaya, Malaysia. Dr. Olugu's current research interest includes Green Manufacturing, Sustainable Production, Green Supply Chain management, Reverse Logistics, Total Quality Management, Inventory management, Industrial Ergonomics and Maintenance Engineering.

Salwa Hanim Abdul Rashid is a Senior Lecturer at the Department of Mechanical Engineering, Faculty of Engineering, University of Malaya, Kuala Lumpur, Malaysia. She obtained her Doctorate Degree in 2010 from Cranfield University, United Kingdom. She also holds both Masters and Bachelor degrees in Manufacturing Management from Loughborough and Salford University respectively. She is an active researcher interested in understanding issues in the implementation and management of the green strategies, with respect to design and manufacturing process in order for companies to achieve industrial sustainability. Her current research is focused on factors that drives, inhibits and enables manufacturing companies to implement sustainable design and manufacturing strategies. She has published more than 40 reputable academic journals, articles and conference papers.

Raja Ariffin Bin Raja Ghazilla is currently working as a Lecturer at the Department of Mechanical Engineering, Faculty of Engineering, University of Malaya, Kuala Lumpur, Malaysia. He obtained both his MSc and PhD in Mechanical and Production Engineering from University of Malaya, Kuala Lumpur, Malaysia. His research interests are in the area of Engineering Design focusing on Sustainable Design, Decision Making in Design and Human Centered Design. He works closely with industry primarily the automotive, manufacturing and SMI. He also holds 3 patent design.

Ehsan Shekarian is currently a PhD candidate at University of Malaya in Manufacturing Management. He received his BSc in Statistics in 2006 at the University of Allameh Tabataba'i in Tehran, Iran. He holds an MSc in Industrial Engineering from the Alghadir Higher Education Institution, Tabriz, Iran in 2009. Furthermore, he has some experiences as a part time Lecturer at Payame Noor University and Islamic Azad University. His research interests are in the area of supply chain management, inventory systems, multi-criteria decision making and heuristic applications of artificial intelligence methods. Besides, he is the reviewer of some prestigious journals such as European Journal of Operational Research, European Journal of Industrial Engineering, Applied Mathematical Modelling, Computational Economics, International Journal of Systems Sciences, Computers & Industrial Engineering and Neural Computing & Applications. He has published various research papers in national and international journals such as Tahghighat-E-Eghtesadi (University of Tehran), Knowledge-Based Systems, European Journal of Industrial Engineering, Journal of Intelligent and Fuzzy Systems, Computers & Industrial Engineering, International Journal of Operational Research, International Journal of Housing Markets and Analysis. He is the editorial board member of some journals such as International Journal of Supply Chain and Inventory Management, International Journal of Multivariate Data Analysis, and Journal of Soft Computing and Decision Support Systems.
