BIOGRAPHY

Onuma Kosanan is doctorate student in Industrial Engineering in the Department of Industrial Engineering, Faculty of Engineering, Kasetsart University, Bangkok, Thailand. She received her Bachelor's Degree in Industrial Engineering from Eastern Asia University, Thailand, in 2002. She received her Master's Degrees in Industrial Engineering from Chulalongkorn University, Thailand, in 2006. She has published journal and conference papers. Her research interests include Hybrid Forecasting Model, Manufacturing, Simulation and Decision Analysis.

Nantachai Kantanantha is an Associate Professor, and Director of Engineering in Industrial Engineering in the Department of Industrial Engineering, Faculty of Engineering, Kasetsart University, Bangkok, Thailand. He received his Bachelor's Degree in Industrial Engineering from Chulalongkorn University, Thailand, in 1997. From 1997 to 2000, he worked at Research and Process Development Department, Kasikorn Bank, the third largest bank in Thailand. He worked as an internal consultant for re-engineering the old processes of other departments. In the end of 1999, he received a scholarship from the Royal Thai Government to pursue his study in the U.S. for Master's and Ph.D. degrees in Industrial Engineering. In August 2000, he decided to join the School of Industrial and Systems Engineering at Georgia Institute of Technology and received his Master of Science in Industrial Engineering in December 2001. He then joined the Ph.D. program at the same institute with a concentration on economic decision analysis. He received his Ph.D. in August 2007. He has published journal and conference papers. His research interests include Economic Decision Analysis and Applied Statistics.
