

International Seminars, as well as for global exchange programs. Due to his different activities, he is well known in his university.

**Muhammad Ibrahim Khan**, Co-Author of the paper “Consideration of Economics and Ergonomics aspects in the Design and Manufacturing of Hydraulic Floor Crane” is studying as an undergraduate student in the Department of Industrial Engineering and Management at Mehran University Of Engineering and Technology, Jamshoro, Pakistan. He is a symbol of intelligence and hard work and always remains eminent among all his fellows in school, college and university .He believes more in practical rather than in theory. Evidence of his practical approach is that he secured 1st position in “Inter Sindh Project Competition” on his project “Thermal Security Wireless Fire Alarm” held at Isra University, Hyderabad and 2nd position in the 3rd semester on project named as “Desmodromic Valve System”. He has worked co-operatively with his group members in a Mega-Project of “Hydraulic Floor Crane” and presented it in different exhibitions. Moreover, he is thinking to attend National and International Conferences during his studies to gain experience and knowledge.

**Dr. Shakil Ahmed Shaikh**, PhD (Ergonomics). Currently working as Assistant Professor in Industrial Engineering and Management, Mehran University of Engineering and Technology. Research interests are ergonomics, lean manufacturing, and six sigma.

**Shahzain Akram** is currently an undergraduate student studying in 2nd year of Bachelors of Engineering in Department of Industrial Engineering & Management at Mehran University of Engineering & Technology, Jamshoro, Pakistan. He is the Co-Author of this paper who worked efficiently with the group members to achieve the desired goal in the form of a successful Mega Undergraduate Project. Mr. Shahzain worked with full interest and courage in designing and manufacturing of the Hydraulic Floor Crane. He is well known for his qualities and intelligence in his entire department. He has been a bright student since his childhood and continuing his efforts, he secured 1st Position in his 1st year of undergraduate studies. He also got 1st Position in his Project named “Geneva Mechanism” manufactured by him in 3rd Semester. Moreover, he is thinking to attend National and International Conferences during his studies to gain experience and knowledge.

**Syed Muhammad Hassan** is currently an undergraduate student studying in 2nd year of Bachelors of Engineering in Department of Industrial Engineering & Management at Mehran University of Engineering & Technology, Jamshoro, Pakistan. He is the Co-Author of this paper who worked efficiently with the group members to achieve the desired goal in the form of a successful Mega Undergraduate Project. Mr. Hassan worked with full interest and courage in designing and manufacturing of the Hydraulic Floor Crane. He is well known for his qualities and intelligence in his entire department. He has been a bright and confident student since his childhood and continuing his efforts, he secured 6th Position in his 1st year of undergraduate studies. He was Assistant Group Leader in a Project named “Geneva Mechanism” manufactured by his group members in 3rd Semester. He is also Vice Class Representative (VCR) of the class. Moreover, he is thinking to attend National and International Conferences during his studies to gain experience and knowledge.

**Dr. Rafique Ahmed Jhatiyal**, Professor, Textile Engineering, Mehran University of Engineering and Technology
