

semiconductor companies, involving process and equipment engineering, product development, and material quality before joining UTP. He is a chartered engineer and member of BEM, IEM, American Society of Quality and Co-Chair of ASME-Malaysia Section.

**Ainul Akmar Mokhtar** is a Senior Lecturer in Mechanical Engineering Department and Head of Master Asset Management and Maintenance under Mechanical Engineering Department, UTP. She obtained her Ph.D. in Mechanical Engineering from Universiti Teknologi Petronas, Masters of Science in Manufacturing Systems, from University of Nottingham and Bachelor of Science in Industrial Engineering, from Purdue University. She has published journal and conference papers and actively involve in plant reliability consultation and training.

**Mokhtar Che Ismail** is an associate professor, currently a senior lecturer and Head of Centre for Corrosion Research, UTP. He obtained his Ph.D. from the University of Manchester, Masters Science (Materials Science and Engineering) from National University of Singapore and Bachelor of Mechanical Engineering from University of Newcastle. His expertise is in Corrosion Engineering, Plant Maintenance and Inspection. Active in research area including CO<sub>2</sub> corrosion, Risk-Based Inspection, Corrosion under insulation, and Plant corrosion. As a high qualified engineer, he is also dynamic in consultation of Failure Analysis, Corrosion training in Corrosion Management, Quality Control, Corrosion Monitoring, Materials Selection and NDT.
