Welcome to Kuala Lumpur and the 2016 IEOM Conference

To All Conference Attendees:

On behalf of the IEOM Society, we would like to welcome you to the Sixth International Conference on Industrial Engineering and Operations Management (IEOM) in Kuala Lumpur, Malaysia. This unique international conference provides a forum for academics, researchers and practitioners from many industries to exchange ideas and share recent developments in the field of Industrial Engineering and Operations Management. Here we have an opportunity to collaborate and advance the theory and practice of major trends in Industrial Engineering and Operations Management. With a record number of attendees over 500, we will also have an excellent opportunity to network with the leading scholars and practitioners of our field. After a thorough peer review process, about 500 papers/abstracts have been accepted from about 750 submissions representing more than 70 countries. The program includes many cutting edge topics of industrial engineering and operations management. Full papers will be published in IEEE Xplore and indexed in Scopus.

The challenge of continuous improvement will be significant in the 21st century and this conference will address the issue of continuous improvement for quality and service. Perhaps the most important example of this issue is the current financial crisis facing the world. This crisis represents extraordinary challenges, but it may also represent significant opportunities for future industrial growth and new directions. We have selected eight outstanding keynote speakers to address these issues:

- Dr. Ron Askin, Prof. & Director, School of Computing, Informatics, and Decision Systems Eng., Arizona State Univ. USA
- Dr. Anwar Ali Mohamed, Former Principal Engineer at Intel Malaysia
- Dr. Zuhairi Abd. Hamid, Executive Director, Construction Research Institute of Malaysia (CREAM), Malaysia
- Dr. Rupy Sawhney, Heath Fellow in Business and Engineering and Professor, University of Tennessee, Knoxville, USA
- Hulas King, Director, Diversity, Professional Affiliations & Global Community Relations, Siemens PLM Software, USA

We are pleased to announce the launch of the Women in Industry and Academia panel, chaired by Ms. Resh Plaha. Its aim is to promote global excellence in academic and business leadership as inspired by eminent women of cultural diversity. The IEOM Society celebrates the invaluable contribution by women on the global stage.

Industry Solutions Track will address industry needs to survive in the competitive environment. Distinguished practitioners share their experiences and journey to be successful and address industrial challenges and opportunities for continuous improvement and sustainability. Lean Six Sigma, Smart Manufacturing and Entrepreneurship workshops are arranged.

With the great success of Global Engineering Education Series of last IEOM conferences, IEOM 2016 Kuala Lumpur Conference will have a dedicated session for the Global Engineering Education where distinguished speakers will discuss the readiness of engineering graduates for workforce around the world. Thirty six featured speakers will be from various part of the world to address engineering education challenges and opportunities. A panel session on Global Engineering Education, chaired by Dr. Abu Masud explores the meaning of global engineering and addressing its educational gap.

The IEOM Society would like to express our deep appreciation to our sponsors, university partners, exhibitors, authors, reviewers, keynote speakers, panel speakers, track chairs, local committee, advisors and the many volunteers who have given so much of their time and talent to making this unique international conference an overwhelming successful event.

Partner Organizations

© IEOM Society International
The International Federation of Engineering Education Societies (IFeES)

IFeES was founded in 2006, at the American Society for Engineering Education’s Global Conference in Rio de Janeiro, Brazil. Engineering education leaders from around the world had gathered the previous year to explore to possibilities of creating an international organization for engineering education societies. IFeES is proud to be leading the effort in connecting the world’s engineering education societies and leveraging our members’ collective strengths in order to improve engineering education worldwide. IFeES members represent a diversity not only in cultures, but in engineering education interests, from quality assurance to engineering education, from pedagogy to the role of technology in the classroom. IFeES member societies are expanding their global reach, and new relationships and collaborations are created all the time through IFeES’ global network.

Through the collaboration of its member societies, IFeES will work to establish effective engineering education processes of high quality around the world to assure a global supply of well-prepared engineering graduates. IFeES will strengthen member organizations and their capacity to support faculty and students. It will attract corporate participation, helping to connect engineering graduates with international corporations that have a pressing need for well-trained engineers who can work in a global environment. IFeES will also enhance the ability of engineering faculty, students and practitioners to understand the varied cultures of the world and work effectively in them.

Global Engineering Deans Council (GEDC)

Recognizing the global need for a world-wide forum of engineering deans and rectors, a group of over 20 leaders of engineering education institutions and corporate partners first met in Rio de Janeiro, Brazil, on 9 October 2006 and in Istanbul, Turkey, on 30 September 2007. Encouraged by IFeES and modeled after the ASEE Engineering Deans Council (EDC), the Global Engineering Deans Council (GEDC) was created on 9 May 2008 in Paris, France. The main goal of the GEDC is to provide engineering deans and rectors with ideas, tools, and “best” practices necessary to become innovative leaders of engineering education.

The GEDC holds annual meetings surrounding four strategic objectives: Institutional Leadership, Curriculum Leadership, Policy Leadership and Accreditation Leadership. Accommodation for its diverse membership, the GEDC has met in Argentina, Brazil, Turkey, Ft. Uriel R. Cukierman, President, International Federation of Engineering Education Societies and United Arab Emirates, and will meet in Italy and Australia in 2015.

Top supporter of HBCU’s 13 years in a row.
siemens.com/goplm

In a survey conducted by U.S. Black Engineer & Information Technology (USBE&IT) magazine, Siemens has been named a top supporter of Historically Black Colleges and Universities (HBCU) for the twelfth straight year.

Siemens provides in-kind software grants to HBCU Engineering and is the only supplier of Product Lifecycle Management (PLM) software among this year’s list of companies. Siemens’ support is part of the company’s focus on STEM (science, technology, engineering and mathematics) education and diversity initiatives that help drive manufacturing revitalization efforts throughout the U.S.

Siemens’ recent $85 million in-kind software grant to Florida A&M is just one example of its commitment to HBCUs. This software will allow engineering students to train using the same technology as major manufacturers around the world.

“We’re committed to leading the industry in diversity initiatives and STEM education support,” said Chuck Grindstaff, president and CEO of Siemens PLM Software. “We will continue to work closely with the HBCU community to develop highly qualified and recruited engineers and technologists. www.siemens.com

IEOM Student Chapters

IEOM Student Chapter can help students in the development or enhancement their outer important skills, including: leadership, communications, organization, planning, time management, budgeting and finance, and other professional skills. Those can help to prepare for their career and to be successful in longer term. If any student group of any educational institute is interested to form an IEOM Student Chapter, please submit chapter establishment form. Contact: info@ieomsociety.org.

Suggested Student Chapter Activities

Workshops and Seminars – The chapter can sponsor workshops and seminars that focus on industrial engineering and operations management. Panel discussions featuring subject matter experts could be featured by industry segments: manufacturing, health, hospitality, education, chemical and plastic, food processing, etc.

Industry Speakers – Chapters could sponsor events in which experience industrial engineers and operations managers present current issues faced by industry. This may also provide an opportunity for chapters to engage their alumni. This type of an event can also provide an opportunity to network and learn about potential employment.

Plant Tours – Chapter members should participate in various industry plant visits. This activity will expose students to industrial engineering and operations management in faced by industry and organizations.

Communication Development – Chapter may consider an activity that focuses on professional communication development – oral and written. Effective communication skills are an important success factor in the engineering and management disciplines. Enhancing the communication skills of chapter members adds value to their membership and their future.

Career Development – The chapter should also focus on career development by reaching out to Industrial Engineering and Operations Management alumni who can provides ideas and tips on engaging employers. Industry human resources managers also may provide insight into the career opportunities. The chapter should also promote the value of internships and co-ops.

Networking – The chapter should do everything possible to encourage its members to build a network of individuals who may be able to assist in opening doors in the future. These contacts are critical to the long term growth and career success.

Poster and Paper Contest – Chapter can sponsor a poster contest that has an industrial engineering and operations management focus. Posters provide an opportunity to display senior design projects and as well as research. The chapter can encourage students to write papers that may be presented in the Annual International IEOM Conference.

Fund Raising – Chapters should engage in fund raising activities including picnic and outdoor activities. This is necessary to support the various chapter events.

Membership Building – Chapters must continue to recruit new members. The IEOM Society will recognize the outstanding chapter membership growth each year at its annual conference.

Community Outreach – Chapters should engage in promoting industrial engineering and operations management as an outstanding career opportunity. This activity could focus on high school students. In addition, the members of the chapter could provide industrial engineering consulting to not-for-profit organizations.

Alumni Relations – Chapter should considering establishing an alumni IEOM chapter. It is important to maintain and build relationship with alumni.
