Biographies

Abdelaziz Berrado, Ph.D., is Department Chair and Associate Professor of Industrial Engineering in EMI School of Engineering at Mohammed V University in Rabat. He holds a Ph.D. degree in Decision Systems and Industrial Engineering from ASU. His research, teaching and consulting interests are in the areas of Big Data Analytics, Industrial Statistics, Operations and Supply Chain Modelling, Planning and Control with applications in healthcare, education and other industries. He published several papers in research journals and conferences with local and international funding. He is member of INFORMS, IEOM and IEEE. He was also a Senior Engineer at Intel

Tarik Saikouk, PH.D., is holder of an engineering degree in industrial systems engineering in 2009 from the Université de Technologies de Troyes and a PhD in management sciences in Supply Chain Management in 2013 at the University of Grenoble. Dr. Tarik SAIKOUK is currently a teacher-researcher at the Rabat Business School (RBS) at the International University of Rabat and also visiting teacher at the ESC Rennes in France. He is also responsible for the International Logistics and Supply Chain Management Master at the RBS. Also, head of the IL & SCM Master in Initial Training and Head of the Executive Master in Global Supply Chain Ecosystem in partnership with SNTL in Morocco and founding member of the Moroccan association of the aeronautical supply chain. His research, mainly empirical, focuses on the dynamics and complexity of the supply chain, strategic behaviors within the supply chain, the supply chain maturity of companies, technologies of traceability and continuous improvement process (Lean management & Theory of Constraints).

Mohamed Hicham Salah Eddine is holder of a master degree in international logistics and supply chain management from the international university in rabat and a phd student at Ecole mohammadia d'ingénieur, his research focuses on big data, supply chain resilience and it's dynamic complexity, specially the debt collecting field, he fonded in 2017 "N Square group", a start up that use advenced technologie to help loan compagnies to search find and manage insolvent debtor.
