

Biographies

Kwete Mwana Nyandongo

Kwete is a lecturer at the college of business and economics, school of consumer intelligence and information systems, in the department of applied information systems. He holds a master's degree in information systems and technology management from the University of Johannesburg where he is currently completing his PHD thesis. He has 11 years of industry experience in IT, working for numerous organisations both public and private, and provide IT consulting services. He lectures undergraduate as well as postgraduate modules including software skills, software project, IT governance, IT project management, and advanced management of IT projects. Over the past 3 years, he has trained more than 370 projects managers in South African organisations across industries and Small to medium business owners.

Kwete's research interest focus on enlightening organisation effectiveness in deriving, managing, overseeing, controlling and sustaining IT investments through IT projects, programmes, and portfolios, and looks at both traditional and agile project management approaches. He is a reviewer for SAICSIT, SACLA and the African Journal of Information Systems. He supervises masters and honours students.

Khanya Khanyile is a student at the University of Johannesburg. She holds a Postgraduate Diploma in Information Systems Auditing. She is currently working for one of the big four banks in South Africa as a Test manager. She has been in the banks IT department for 11 years with exposure to various software development methodologies including the waterfall model, v-model and currently is delivering projects using agile methodologies. The interest on agile governance stems from the challenges experienced by the IT delivery teams in the bank over the past six years in delivering projects using agile methodologies and having a governance mechanism that guides delivery of such projects.
