Abstract

The smart living is one of the important elements of smart city. This research purposes to present a thorough knowledge map of the intellectual structure of smart living study based on the dataset collected from the Scopus database. A bibliometric approach was employed by analysing 518 scientific articles published between 2002 and 2020, using the VOSViewer application, and analyze search results function on Scopus. The study discusses an overview and the prominence of articles, authors, organization, country, publication sources, collaborative researcher, and research themes. This research proposes a mapping of smart living research themes based on the classification of knowledge development from eighteen years of publication: living, information management, smart city, smart home, and sustainable development, as LISSS research themes.

Keywords

bibliometric, smart city, smart living, research themes, research mapping.

Acknowledgments

This work is supported by Research and Technology Transfer Office, Bina Nusantara University as a part of Bina Nusantara University's International Research Grant entitled "Smart City Application: Accelerating Community Participation of Sustainable City Development" contract number: 017/VR.RTT/III/2021 on March 22, 2021.

Biographies

Agung Purnomo is a researcher and faculty member of the Entrepreneurship Department, BINUS Business School Undergraduate Program at the Bina Nusantara University, Malang Campus, Malang, Indonesia. He earned a Bachelor of Agriculture in Horticulture from Brawijaya University, Indonesia; and a Master of Business Administration in Creative and Cultural Entrepreneurship from Institut Teknologi Bandung, Indonesia. Mr. Agung is currently pursuing a Ph.D. in Management Science at Airlangga University, Indonesia. He has published several journals and conference papers using bibliometric methods in collaboration with multidisciplinary researchers.

Hendro Nindito is an Assistant Professor and content specialist of the faculty member of the Information Systems Department, School of Information Systems at the Bina Nusantara University, Jakarta, Indonesia. He earned a Bachelor of Science in Computer Science Math from Padjadjaran University, Indonesia; and a Master of Management Information Systems from Bina Nusantara University, Indonesia. Mr. Hendro is currently pursuing a Ph.D. in Computer Science at Bina Nusantara University, Indonesia. His research interests include e-tourism, applied databases, and information systems. He has 13 years of experience in the IT field such as training, coaching, mentoring, and consulting.

Evaristus Didik Madyatmadja is an Associate Professor and faculty member of the Information Systems Department, School of Information Systems at the Bina Nusantara University, Jakarta, Indonesia. He earned a Bachelor of Engineering from Atma Jaya University, Indonesia; Master of Computer Science from Gadjah Mada University, Indonesia; and Ph.D. in Computer Science from Bina Nusantara University, Indonesia. He has published more than 50 peer review scientific publications. Mr. Didik is an Editor in Chief of the Computer, Mathematics and Engineering Applications Journal (Comtech). He is a General Chair of the 6th International Conference on Information Management and Technology (ICIMTech) and Technical Committee of the 5th International Conference on Education and E-Learning (ICEEL) in 2021. His research interests include e-government, big data, data mining, and business intelligence. He is an active member of IEEE and the International Association for the Engineers and Computer Scientists (IAENG).

Albert Verasius Dian Sano is an Assistant Professor and faculty member of the Computer Science Department, School of Computer Science at the Bina Nusantara University, Malang Campus, Malang, Indonesia. He earned a Bachelor of Engineering in Mechanical Engineering from Gadjah Mada University, Indonesia; and a Master of Computer Science from Gadjah Mada University, Indonesia. Mr. Albert has published several journals and conference papers. His research interests include data mining, data analytics, and human-computer interaction.

Corinthias P.M. Sianipar is a researcher and faculty member of the Department of Global Ecology, Graduate School of Global Environmental Studies (GSGES) and Division of Environmental Science and Technology, Graduate School of Agriculture (GSA) at the Kyoto University, Kyoto, Japan. He has published several journals and conference papers.
