Abstract

The Covid-19 pandemic hit the whole world, including Indonesia. In this situation, each institution must be prepared to face a health crisis that highlights the economic crisis. The Government is one of the most highlighted institutions in COVID-19 crisis management. The mass media, especially online media, preach in different framing. This paper will analyze the framing of news related to crisis management conducted by the Indonesian Government on three online media, namely Detik.com, Kompas.com, and tribunews.com. This research uses a qualitative method with Robert Entman's framing analysis. The results showed from The Governat's Covid-19 crisis management has made policy on both prevention and impact handling. In conclusion, Crisis Management COVID-19 Governments involve all the community, the business sector, and the relevant ministries. Social Demographic and infrastructure conditions cause the handling to be complex is not merely the health aspects but involve the economic and social aspects.
