Abstract

Based on the Monthly Socio-Economic Data Report for the Province of Bali in August 2021 by BPS, the number of international air transportation flights departing from I Gusti Ngurah Rai Airport in June 2021 was recorded as 21 flight units. This figure is higher than the number of international flights in May 2021, which recorded 20 flights. The same condition and classified as worse can still be seen from comparing the record for the same month the previous year. On a year-on-year basis, the number of international aircraft departures decreased by 34.38 percent. Regarding the number of international flight passengers, no international flight passengers are departing overseas from Ngurah Rai International Airport. Compared year on year, the record number of passengers in June 2021 has decreased by almost 100 percent.
