

Engineering, Federal University of Petroleum Resources, Effurun, Nigeria, and currently undertaking his PhD study at the University of Warwick, United Kingdom.

Aworinde K. Abraham is a full-time lecturer and PhD student in the Department of Mechanical Engineering, Covenant University, Ota, Ogun State, Nigeria. His research interest is in the area of Fracture Mechanics. He is currently working on the fracture behavior of biodegradable reinforced polymer for orthopedic applications.

Eyere Emagbetere is currently a full-time lecturer in the Department of Mechanical Engineering, Federal University of Petroleum Resources, Effurun, Nigeria. He holds a PhD degree in mechanical engineering from the University of Ibadan. His research areas include numerical simulation, modelling and mechanics.

Samson Oluropo Adeosun is a full professor of Metallurgical and Materials Engineering in the Department of Metallurgical and Materials Engineering, University of Lagos, Nigeria. His works are in the area of materials development, processing and characterization.

Benjamin U. Oreko is currently a full-time lecturer in the Department of Mechanical Engineering, Federal University of Petroleum Resources, Effurun, Nigeria. He holds a PhD degree in mechanical engineering from the University of Benin, Nigeria. He is an expert in materials development.

Oyawale A. Festus is a full professor of Mechanical Engineering in the Department of Mechanical Engineering, Covenant University, Ota, Ogun State, Nigeria. His research area is design and production.

Felix A. Ishola is a full-time lecturer and PhD student in the Department of Mechanical Engineering, Covenant University, Ota, Ogun State, Nigeria. His research interests are Risk Analysis, Waste Management, Materials development, Design and Modelling. He is currently working on waste tyre to produce graphite for electrode production.

Ajayi O. Oluseyi is a full time professor in the Department of Mechanical Engineering, Covenant University, Ota, Ogun State, Nigeria. His research interest is in Thermo-fluids and Renewable Energy Systems. He has also worked extensively in the area of Design and Production Technology.
