Biographies

Camio Vaca, architect graduated and current Construction Mastery student at Universidad Nacional de Colombia. He works as a BIM Manager of Colpatría construction company and is part of BIM Forum Colombia. He has experience in institutional and housing construction. He has participated in research projects under the line of construction project management and construction digital model as well as, BIM implementations in different states of maturity.

Nataly Alvarado, is an industrial designer with a Masters degree in industrial engineering from the National University of Colombia. She works within this university as well as in the Global Campaign, 100 million for a 100 million, led by the Foundation for a Better world. Her investigative projects can be classified in three lines of study within innovation: competence strategies, as she won the award for the undergraduate thesis for her development of new products and processes in small businesses; communication strategies for her work obtaining the Guinness World Record with the creation of a mobilization strategy that enforced public policy within the country and finally social innovation with the creation of an investigative group on this topic for her alma mater. She was an Incae Business School scholar and a trustee in the Social Entrepreneurial Summit hosted by the international non profit VIVA for her work in socially innovative projects.
