

"4th Co-op meeting"

In cooperation with the System Engineering Club at KFUPM, the Co-op student meeting took place on Wednesday the 29th of January. 25 students learned many things by four students whom shared the earned skills with their colleagues from different worldwide companies and local ones, such as Saudi Aramco, Mozn, General Electric and KPMG. The event was a success due to the value it provided the students with by their colleagues. They were given the chance to see the work environment from a wider angle that would be quite helpful in the after graduation phase.
