Abstract

The research conducted to do overview research related to cinema graph. The research conducted to do overview research related to cinema graph based on the Scopus database from 2011-2021. The methods used in this research is bibliometric. From the search results founds there is 28 documents results related with cinema graph during 2011-2021. From 2011-2021 the number of documents continued to experience an ups and downs. The number of documents in 2021 is 3 documents, which is an increase from 1 document in 2011. The source of the document with the highest number of 5 documents is ACM Transactions on Graphics. The dominant document type is conference paper with a total of 17 documents. The United States is the country with the highest number of documents with 11 documents. Microsoft Research is the affiliate with the most documents with 5 documents. The subject area of research related to cinema graphs is computer science with a percentage of 56.1%.

Keywords

Cinema graph, research, trends, bibliometric

Biographies

Hindam Basith Rafiqi is a faculty member of Bina Nusantara University in the Visual Communication Design Department, School of Design.

Lutfi Tri Atmaja is a faculty member of Bina Nusantara University in the Visual Communication Design Department, School of Design.

Victor Adiluhung Abednego is a faculty member of Bina Nusantara University in the Visual Communication Design Department, School of Design.

Donna Carrollina is a faculty member of Bina Nusantara University in the Visual Communication Design Department, School of Design.

Fairuz Iqbal Maulana is a lecturer at the College of Computer Science, Bina Nusantara University, Indonesia. He earned two master's degrees, the first in the field of Interdisciplinary Program of Information System, Pukyong National University (PKNU), Busan, South Korea. The second in the School of Electrical Engineering and Informatics (STEI), Bandung Institute of Technology (ITB), Indonesia, with specializes in Multimedia and Games. His research fields are Game Programming, Computer Vision, Facial Recognition, Augmented Reality, Virtual Reality for education, Internet of Things. He is the head of the Digital Technopreneur Laboratory Bina Nusantara University in Malang campus.
