## Abstract

The notion of digital transformation (DT) has piqued the interest of both scholars and practitioners in recent years, resulting in a developing autonomous research topic. Digital transformation (DT) has developed as a significant phenomenon in a variety of fields, including business and management. Using bibliometric mapping, this study attempts to comprehensively identify research trends on digital transformation and potential for future research in the field. We visualized the Digital Transformation (DT) research published in the recent five years, from 2017 to 2021, using the bibliometric analysis approach. For our study, a total of 93 Scopus publications were chosen. This study pulls data from the Scopus database, employs the Scopus online analysis tool, and using Vosviewer to display the bibliometric network. The process is divided into five stages: keyword selection, first search results, search result refining, initial compilation, and data analysis. According to our major line of study, papers published by Chinese scholars have the most publications, with 15 scientific publications. The topics of Business, Management, and Accounting have the most documents, 45 in all (19.8 %). The analyzed data reveals patterns and trends in worldwide Scopus-indexed articles. The analyzed data reveals patterns and trends in worldwide Scopus-indexed articles. This study suggests integrating research topics: Artificial Intelligence, Digital Technology, and Science Database, abbreviated as AIDTSD.

## Keywords

Scientometric, bibliometric, digital transformation, research trend, mapping

## **Biographies**

**Fairuz Iqbal Maulana** Fairuz Iqbal Maulana, S.T., M.Eng., M.T. is a lecturer at the College of Computer Science, Bina Nusantara University, Indonesia. He earned two Master's degrees, the first in the field of Interdisciplinary Program of Information System, Pukyong National University (PKNU), Busan - South Korea, and the second in the School of Electrical Engineering and Informatics (STEI), Bandung Institute of Technology (ITB), Indonesia with specializes in Multimedia and Games. His research fields are Game programming, Computer Vision, Facial Recognition, Augmented Reality, Virtual Reality for education, Internet of Things. He is the head of the Digital Technopreneur Laboratory in Malang campus. He can be contacted by email: fairuz.maulana@binus.edu

**Gusti Pangestu** is a researcher and faculty member of Bina Nusantara University, Computer Science Department, Indonesia.

**Donna Carrollina** are researchers and teaching staff of the Department Visual Communication Design (Malang City Campus), Indonesia. He obtained his bachelor's degree from the Indonesian School of Visual Arts and Design in 2013; and Masters in 2017 from the Indonesian Institute of the Arts Yogyakarta, Indonesia.

**Febby Candra Pratama** is a researcher and faculty member of the Entrepreneurship Department, BINUS Business School Undergraduate Program at the Bina Nusantara University, Malang Campus, Malang, Indonesia. He earned a Bachelor of Economic in Management from Universitas Negeri Malang, Indonesia; and a Master of Management from Brawijaya University. Mr. Febby has published several journals and conference papers. His research interests include strategic management, SMEs, business performance, and entrepreneurship.

**Andi Pramono** is a researcher and faculty member of Bina Nusantara University, Computer Science Department, Indonesia.
