

Table of Contents

7th Asia Pacific Industrial Engineering and Operations Management Conference

Bangkok, Thailand, March 25-27, 2026

ID	Title	Page
8	Effective BPMN for Vehicle Project Management	1
9	AI-Driven Framework for Automated Bridge Deterioration Detection and Management	2
10	Artificial Intelligence Mobile Based Technology Growth Impact to Children with Special Needs	4
11	Discrete Event Simulation for Design of Source-Segregated Waste Collection System to Maximize Recycling Rates: A Case Study of Vietnam National University Ho Chi Minh City Urban Area	15
14	Building Inclusive and Sustainable Work Systems in the Manufacturing Industry: A Soft System Approach	16
23	Mapping the Landscape of Supply Chain Decentralisation in a Turbulent World: A Systematic Literature Review	17
24	The Interrelationships Among Industry 4.0 Technologies, Cloud ERP and Industries Performance: A Quantitative Study Using Amos	19
28	A Generalizable Framework for Print Defect Detection using Frequency Filtering and Data-Driven Feature Selection	28
30	Mapping the Intellectual Landscape of Industry 4.0 Integration in Circular Agrifood Supply Chains: A Bibliometric Analysis with a Focus on Food Security Challenges	29
31	Designing an Academic Progress Monitoring Information System for Engineering Education: A Case Study at UPLB	40
65	Transerve: A Linear Programming-Based Decision Support System for Optimizing Vehicle Reservation Operations	56
66	Improving Inventory Turnover in a Meat-Processing Company by Applying MRP II	58
67	Reduction of Baffles Manufacturing Times in a Metalworking Company through Lean Manufacturing and SLP	68
68	Optimization of the Manufacturing Process in a Peruvian Textile Workshop Under the TPM Philosophy and the 5s Tool	79
69	Production Improvement Model to Increase Productivity by Applying SMED and Preventive Maintenance in a Pet Products Company	91
71	Production Model for Reducing the Return Rate in A Textile Manufacturing Company by Applying Lean Manufacturing and TQM Tools	103
72	Change Management for AI in Service Operations: A Paradox and Routine Dynamics Perspective	114

73	A Universal Scheduling Application for Product Portfolios	115
75	MoveMate: The Ergonomic Exercise Device for Chronic Office Workers	123
76	Maturity Assessment of Industries on the Net Zero Emission Journey	124
82	Assessing the Impact of Concurrent Employment and Undergraduate Studies on the Mental Workload of Student Virtual Assistants in the Philippines	125
83	Revalorization of Shihuahuaco Wood Waste (Dipteryx Micrantha) for Briquette Production	139
85	Global Trends in IT Governance for SMEs Cybersecurity (2015-2025): A Bibliometric Analysis	150
88	Generative AI Chatbots' Performance Across Different Domains of Industrial Safety Engineering	162
90	Designing Service-oriented Circular Supply Chains for Electric Vehicle Batteries	174
92	Application for Generative AI tools in Project Management practices	184
93	Enhancing Entrepreneurial and Digital Marketing Skills among High School Students through Project-Based Community Engagement: A Case Study in Indonesia	185
94	Control System for a Power-Assisted Wheelchair on Sloping Terrain Using IMU	193
97	Systematic Review on the Convergence of Lean, ABC–FSN Inventory Classification, and Industry 4.0 in Strategic Food Logistics	198
98	Development of the HDDs Assembly Line to Improve Throughput Using Simulation Method	208
99	XAI in Healthcare	217
104	Comparison of Different Motor Topologies for Electric Vehicle Drives	218
105	Research on Environmental Testing: A Confidence Level Perspective	229
128	Optimising Efficiency in Manufacturing Processes Through Lean Approaches	230
130	Simulation-Based Optimization of the Outbound Warehouse Dispatch Process to Minimize Risk of Delivery Discrepancies	243
135	Circular Value Chain for Indonesia's School Feeding: An SSCM Perspective	255
136	Design and Analysis of Machine Downtime Reduction Using Simulation and Modeling Methods	266
137	Applying Machine Learning Techniques to Consumer Behavior Research in the Senior Fitness Market	276
138	Design and Pilot Implementation of a Low-Cost IoT-Based Temperature Monitoring System for Cacao Fermentation Optimisation	278
139	Servitization of Manufacturing in Disruptive Supply Chains: Assessing Resilience Strategies for FMCG Sector	288

141	SmartFort: Joint Dispatch and Response Coordination of Public Service Resources Using Artificial Intelligence	289
142	Mechanisms of Corporate Greenwashing: The Moderating Role of Managerial Ability	295
143	A Integrated Decision Framework for Predictive Maintenance and Dynamic Scheduling in Manufacturing with Rework	297
144	Advanced Process Control System for CVD Equipment Using Big Data Analytics and Optimization Algorithms	299
145	Deep Progressive Learning for Grain Boundary Segmentation and Grain Size Estimation Using CNN-Based Models	301
146	Digital Twin Enabled Multi Supplier Coordination and Production Planning under Dynamic Reliability	310
148	Inventory of Textile and Apparel Industry in Japan Over the Last 30 years	312
149	A Conceptual Research Framework for Workforce 5.0 Skills Development in Industry 5.0 Transformation	314
150	Digital Twin for Emergency Evacuations from Toxic Gas Incidents caused by Electric Vehicle Fires	323
151	A CAMEL-Based Optimization Framework for Risk Reduction and Performance Improvement in Cooperative Banks	325
152	A K-Means Clustering-Based Heuristic for Atypical Manpower Shift Planning in Manufacturing	336
153	An Analytical Model for Communication Networks Based on the Multi-Factor Information Channel Approach	347
154	Application of Quality Management Tools to Enhancing Quality Performance Score	349
155	Reduce Waiting Times at Electric Truck Charging and Battery Swapping Stations Through Optimized Facility Layout Design: Case Study ABC Company	351
157	Automation of Reporting System Using Visual Basic for Application Macro: A Case Study in an Insurance Company	369
158	Optimizing Workforce Shuttle Scheduling System For Multishift Manufacturing Operations Using Integer Linear Programming in a Semi-conductor Company	383
160	Unveiling Heterogeneity in Circular Economy Strategies: An LLM-Based Clustering Approach to Environmental and Economic Performance	394
161	Improving the Cutting Process of AC Insulators Using Lean Manufacturing and Simulation Modeling	396
162	Waste Reduction in the Mosquito Coil Drying Process	409
176	Optimization of Job Shop Scheduling Using Dispatching Rules and Genetic Algorithms: An Industrial Case Study at Al-Rayef Factory for Aluminum and Glass	418

177	Improvement of a Key Performance Indicators Monitoring System Using a Systems Engineering Approach: A Case Study of the Institute of Engineering, Suranaree University of Technology	430
178	Patterns of Changes in Financial Statement Numbers in Restated Financial Statements	442
179	A Human-Centric Design Framework for Digital User Fulfilment in Online Food Delivery Platforms	444
180	Failure Detection of Actuator Using Extended Semi-strongly Stabilizing Controllers	461
181	High-Resolution Micro-CT Mapping of Craniofacial Suture Gap Architecture in Vitamin D Deficiency: A Quantitative Anatomical Landmark Approach	466
182	Enhancing Production Efficiency and Waste Reduction in Medical Tube Extrusion through Self-Centering Die Design and Material Optimization	478
183	Development of an Artificial Intelligence System for Insulation Condition Assessment in Generators	490
184	The Impact of Ultrasonic Scalers on Musculoskeletal Disorder Risk During Dental Prophylaxis Among Dentists in the Philippines	500
185	Study of Odor Nuisance and Mitigation Measures for Cup Lump Rubber Used in Rubber Manufacturing Plants	511
186	Exploring the Reasons Behind Hard Hat Non-Compliance Among Filipino Site Workers: A Qualitative Study	521
187	Application of a Systematic Approach for Monitoring Between Foresight and PEP in the C2C Bridge Project	533
188	Severity Assessment of Delays in Medical Cold Chain Logistics	546
189	Improving Length Accuracy in Steel Sheet Production in a Mini Leveller Process: An Industrial Case Study	548
190	Development of a Posture Assessment Model Using Computer Vision to Analyze Musculoskeletal Injury Risk in Truck Drivers	557
191	Key Success Factors for a Latecomer Electronics Manufacturer: A Case Study of HDD Component Production in Laos	569
192	Strategy for Productivity Improvement in a Readymade Garments (RMG) Manufacturing Factory	580
193	A Techno-Economic Feasibility Assessment of On-Grid Rooftop Solar PV Systems for Urban Office Buildings in Thailand	587
194	A Simulation-Based Analysis of Campus Characteristics and Free-Floating Bike-Sharing System Design on Accessibility and Usage	596
195	Implementation of Inventory Management System through Material Requirements Planning (MRP) in a Manufacturing Company of Punched Paper Carrier Tape	609
196	Antecedents of Green Energy Transition Adoption: A Meta-Analytic Assessment	622

199	Performance Evaluation of Low-Cost MEMS Accelerometers for Machinery Vibration Monitoring: A Comparative Study with IEPE Sensors	636
200	Off-Road Hazard Map for Emergency Logistics in Island Regions	648
201	Application of Boron-Doped Reduced Graphene Oxide for the Degradation of Rh B Dye using Adsorption Methods	658
202	Applying Lean Management to Enhance Operational Efficiency and Reduce Costs in Academic Administration: A Case Study of Minimizing Logistics Costs	665
203	Case Study: Application of QR Codes to Develop a Storage System for Pipe Spools in an Erection Yard	674
204	Development of Multi-Position Finger Bot (MPFB) for AMR Elevator Button Pressing	686
206	Multi-Level Analytical Hierarchy Process in Supplier Performance Evaluation for Mining Equipment Procurement	698
207	Designing a Decision-Support System Architecture for Career Selection: A Case Study at the University of the Philippines	717
208	Process Improvement of Academic Advising for Engineering Students with GPAX Below 2.00: A Case Study at Suranaree University of Technology	732
209	Optimizing Runway Departure Scheduling Based on a Max-Plus Algebra TSAT Decision Model	743
210	Enhancing Operational Efficiency of Tourist Transportation with a Mathematical Programming Approach	752
211	Comparative Thermal Analysis of Flat Roof and U-Shaped Roof with Different Insulation Material	761
212	An AI-Integrated Hybrid Life Cycle Assessment Framework for CO ₂ Emission Prediction in Dairy Supply Chains	769
213	Unsupervised Anomaly Detection in CNC Milling Processes using Frequency-Domain Feature Extraction and One-Class SVM	778
214	Blind Box as an Experience-Based Business Strategy for SMEs in Emerging ASEAN Markets: A Stimulus–Organism–Response Approach	787
215	Circular Supply Chain Model for Reducing Food Waste in Local Bakery Industry: A Case Study in Yogyakarta Tourism Small and Medium Enterprises (SMEs)	799
216	Beyond MAPE: Product Mix Deviation and Inventory Response in Hierarchical Demand Forecasting	817
218	Predictive Waste Classification and Reverse Logistics Optimization Using Machine Learning in a Circular Supply Chain: A Case Study of Thread Dyeing Company	828
220	Applying Lean Six Sigma and SMED to Improve Pre-Assembly Operational Efficiency	864

222	An Integrated Heuristic for Make-to-Stock Production Scheduling: Balancing Efficiency and Service Level under Sequence-Dependent Setup Times	880
224	Optimizing Ambulance Routing with Time Series Forecasting for Hospital Readiness and Emergency Call Patterns	891
225	Predicting M&A Value Creation: A Machine Learning Benchmark of the Indigestion Hypothesis in U.S. Markets	911
230	Establishing Product Quality in The Market Through Flash Sales	919
231	Selective Clearance Markdowns for End-of-Season Inventory Under Demand Uncertainty	920
233	An Application of Lean Techniques for Process Enhancement in the Food Manufacturing Sector	921
237	Energy Consumption Analysis and Conservation Guidelines for the Pineapple Industry Supply Chain	931
238	Intrapreneurship as a Functional Competency in Production Engineering: An International Comparative Analysis	944
240	An Integrated SLP, S&OP, and 5S Approach to Improve Order Fulfillment in a Polyester Fiber Warehouse	960
241	Classifying Impression Management in MD&A Using Text Mining: Evidence from Japanese Listed Firms	975
258	Hybrid Project Management and Certified Sustainability Performance in Infrastructure Megaprojects: Evidence from the LaGuardia Terminal B Redevelopment	987
265	Generative AI Integration in Tourism: An Empirical Study from an Emerging Economy	996
274	Critical Path Method and Economic Analysis of a Smart Leak Detection System for Desalination Water Networks in Saudi Arabia	1009
278	Design and Implementation of a Controlled Environment Chamber to Accelerate Germination of Slow-Germinating Lettuce Seeds using Trade-off Analysis in Villegas Organiks and Hobby Farm	1022
279	Phytochemical Screening, Bioactive Compound Determination in Relation to the Ethnomedicinal Uses of Tambae (<i>Phyllanthus buxifolius</i>) on Indigenous People	1035
280	Optimizing Manpower Allocation by Developing Integer Linear Programming-Based System at Jacksonville Creative Concept Mfg. Inc., in Alaminos City, Laguna	1036
281	S-DBR: A PPC Approach Beyond Bottleneck Scheduling	1048
284	Reducing Defects through the Application of DMAIC, Six Sigma Methodology in a Tissue Converting Company in Tanauan City, Batangas	1064
285	AI-Automated School Bag Car	1077
287	An AI-Driven Decision Support System for Household Wildfire Readiness: Integrating Interpretability and Recall Optimization	1079

291	Optimization of FMCG Supply Chain Networks Under Demand and Disruption Uncertainty: An Operations Research Approach	1089
292	A Dual-Phase Metaheuristic Framework for the Capacitated Location-Routing Problem: Leveraging Evolutionary Path Relinking and Genetic Algorithms for Supply Chain Cost Optimization	1098
293	Multi-Objective Optimization for Electric Vehicle Charging Station Placement: A Hybrid NSGA-II Approach with Locational Fairness Consideration	1118
294	Enhancing Comfort and Ergonomic Redesign of Seats for Tricycle Drivers at the Tricycle Operators and Drivers Association in Lipa City, Batangas	1132
296	Room Allocation Planning in Room Rental Business Using Integer Linear Programming	1143
297	Scenario Reduction for Two-Stage Stochastic Programming using Variance-Weighted K-means and Particle Swarm Optimization	1155
298	Lean Six Sigma-Based Optimization of Wolffia Globosa Drying Technologies	1165
300	On Solving the Assignment Problem with Conflicts	1175
301	Volatile Organic Compounds (VOCs) Biomarker-based Early Warning System for Spodoptera frugiperda Detection and Monitoring Using an Electronic Nose	1183
302	Quantum-Inspired Machine Learning for S&P 500 Price Movement Prediction	1193
303	Application of Artificial Intelligence for Optimizing Grinding Wire Procurement in the Automotive Parts Industry: A Case Study of an Auto Parts Manufacturer	1206
310	Effects of Theta (6 Hz), Beta (15 Hz), and Gamma (40 Hz) Binaural Beat Stimulation on Adolescents' Reaction Time	1207
313	Visual Fatigue and Digital Ergonomic Risks among University Students in Screen-Based Learning Environments: A Review	1217
314	Explainable Uncertainty-Aware XGBoost for Industry 4.0 IoT: Risk-Aware Shop Floor Optimization	1232
317	Unravelling the Perception of Workplace Ostracism among Transgender Population: A Qualitative Study	1241
318	The Use of Blue Whale Proteins in DNA Reparation to Prevent Cancer	1252
337	Improving Manufacturing Product-Service Systems through Predictive Maintenance	1262
338	Application of Cellulose Nanocrystals from Sugarcane Bagasse in Eco-Friendly Detergent Formulations	1271
341	Intelligent Device for Detecting Pesticide Residues and Sweetness in Thin-Peel Fruits	1284
350	Post-Harvest Inefficiencies and Downstream Value Concentration: A Field-Based Value Chain Analysis of Thailand's Cacao Sector	1285

351	A Multi-Objective Optimization Model for Clinical Rotation Scheduling of Medical Students in a Multi-Campus Medical School	1296
354	Cross-Border E-Commerce Warehouse Location-Allocation Optimization in Southeast Asia: Integrating Qualitative and Quantitative Decision Criteria Using AHP and Goal Programming	1304
355	Integration of Engineering Graduate Attributes with Lean Manufacturing to Enhance Work and Education Systems: Industrial Engineering Field, South Africa	1319
356	MCDM Framework for Optimal Supplier Selection of GMAW and GTAW Welding Equipment Using Fuzzy AHP and TOPSIS	1330
362	DEA-Based Assessment of Inland Dry Port Efficiency in ASEAN: Evidence from Myanmar	1338
365	A Structured Method for Energy Performance Evaluation within ISO 14001 Environmental Management Systems	1339
369	Do All Related Party Transactions Matter? Evidence from Financial and Operational RPTs and the Cost of Debt in Indian Manufacturing Firms	1351
370	Macroeconomic Transmission Channels and Outbound Cross-Border M&A: Evidence from India, China, and BRICS	1363
373	Integrating Dealer Insights and Consumer Preferences in Electric Vehicle Purchase Decisions: An AHP-Based Study in Thailand	1376
374	Chronic Kidney Risk Prediction Through Nail Abnormalities Identification Using AI Image Processing	1389
375	Enhancing Safety Behavior through Safety Awareness and Safety Knowledge: A Meta-Analysis Model for Musi River Transport	1401
389	Application of Six Sigma Methodology to Reduce Defective Products in Temperature Control Device Manufacturing	1410
391	A Calibrated Machine Learning Framework for Predictive Maintenance in Industry 4.0: Balancing Reliability and Economic Optimization	1422
392	From Waste to Value in Drilling Operations: MFA of Pertamina's Circular Uniform Upcycling Initiative	1435
393	Impact of Employee Stock Option Plans on Firm Performance: Sectoral Evidence from India's IT Industry	1444
394	Integrated Machine Learning and Economic Risk Modeling for Reliability-Centered Asset Management in Electrical Distribution Networks	1454
398	Improvement Process to Increase Inventory Turnover through Random Forest and Slotting in a Solar Water Heater Trading Company	1467
399	Semantic Integrity in the Age of Autonomous Orchestration: Addressing the Implementation Gap in Model Context Protocol and Agentic Workflows	1479

401	Effect of Lattice Design and Multi-Material Arrangement on Compressive Load Performance Towards Sustainable Additive Manufacturing of 3D Complex Component	1480
402	Development of a 3-DOF Robotic Arm with Gesture-Based Control to Support Intelligent and Sustainable Additive Manufacturing Environment	1481
416	An Integrated AHP–Mathematical Programming Approach for Make-or-Buy Decisions in Pile Driving Machine Components	1482
418	Use of the Photocatalysis Method with a Composite of Titanium Oxide and Bismuth Oxide for the Removal of Dyes from Textile Wastewater	1494
419	A Scoping Review on Consumer's Perception on AI Generated Content	1505
420	Artificial intelligence-based prediction of electrode life for resistance spot welding process	1514
423	Heat Pumps and Solar Energy: Real-World Applications for Reducing Fossil Fuel Consumption	1525
434	Digital Procurement Maturity across Kraljic Categories: A Pharmaceutical Industry Case Study	1526
435	Heat Pump Application for Energy Reduction in Compact Heat Exchanger Manufacturing	1527
436	Risk Identification and Risk Prioritization During Project Execution in Industrial Technology Company	1537
442	Developing SCBA Frameworks for Healthcare Energy Transitions in Emerging Economies	1549
443	Climate-Responsive Design for Puskesmas: Energy and Comfort Analysis in Coastal North Sulawesi	1563
445	Unpacking Constant Connectivity: A Systematic Review of Its Outcomes and Motivational Pathways	1575
446	Ownership Structure and Mergers and Acquisitions: Evidence from India	1590
447	Daily Ridership Forecasting for Urban Public Bus Transportation	1601
451	Promoter Share Pledging and Downside Risk: Evidence from Indian Listed Firms	1612
462	Constrained Consumption in Essential Service Ecosystems: A Multi-Level Systems Design Framework	1625
468	RAG-Enhanced Cognitive Intelligent Recommendation Agent for Self-Evolving Failure Recovery in Manufacturing System Operations	1634
481	A Review Joining of Dissimilar Duplex AISI 2205 and Austenite AISI 321 Stainless Steel Using Gas Tungsten Arc Welding	1647
482	Reducing Wait Times with 5S Tools, TPM, and Plant Design for the Ophthalmology Office	1649

483	Strategic Training and Pay-for-Performance Design for Profit Maximization	1660
484	Strategic Transformation of Hotel Workforce Management Through the Introduction of Service Robots	1662
485	KPI-Based Management Dashboard for Hotel Industry: A Case Study of Eland Park	1664
491	Design Knowledge-Powered Graph Attention Network (GAT) for Performance Prediction of Signal Transmission Devices	1666
507	Review of High-Performance Computing Liquid Cooling Technologies	1679
508	Development of a High-Performance Computing Liquid Cooling System	1690
509	Institutional Model for Renewable Energy Management Based on the Energy-Self-Sufficient Village/Hamlet in Southwest Sumba	1699
510	Sustainable Operational System for Drinking Water Management PDAM Tirta Pakuan, Bogor City	1712
511	A Lean-Based Spreadsheet Information System for Improving Inventory Control in a Small Primary School	1722
