

Table of Content

6th South American International Conference on Industrial Engineering and Operations
Management

Sorocaba, Sao Paulo, Brazil, May 12-15, 2025

ID	Title	Page
2	Integration between RFID and OPC-UA applied to a Flexible Manufacturing System (FMS)	1
4	Dynamic Capabilities and Resilience in Manufacturing: The Role of Digitalisation and Automation in Adapting to Market Volatility	13
5	A Multi-objective Simulation based Optimization Model for Outpatient Care Delivery	16
6	Risk Prevention Model for Enhancing Safety in Educational Centers: Application of HIRARC, Signage, and Evacuation Maps according to ISO 45001, a Case Study	17
10	Hole-Making in Nickel-Based Superalloys using the Expanding Jet of CO ₂ and Through-the-Tool Micro-Lubrication	29
11	Robustness of a Metal Finishing Process Using a Lean-Sigma Approach.	39
13	Hypothesis-driven Risk Management: An Approach to Enhancing Efficiency in University Research Projects	50
15	Application of lean manufacturing tools to reduce the impact of external factors on industrial quality	63
16	Improving Risk Management in University Research: Identifying Critical Risks with a Digital Twin Approach	73
17	Implementation of the 5S Methodology to Increase Productivity in the Rollers Shades Production in a SME	85
18	The Relationship between Quality Management and Innovativeness: An Empirical Study	96
32	Cadeia de Suprimentos e Indústria 4.0: Uma Revisão de Literatura	99
33	Minimum Edge Compact Spanner Problem	109
36	Sustainable Design of a Solar-photovoltaic Electrocoagulation Wastewater Treatment System for Kuwait Oil Industry	111
38	Microstructural and Mechanical Analysis of 7075 Aluminum Alloy After Shot Peening Treatment	112
39	Fatigue Behavior of AA5050 Alloy After Shot Peening Treatment	125
40	Critical success factors for creating, delivering and capturing value in connected cars	133
41	Management Model to Improve the Service Level in a Chemical Products Trading Company	142
42	Leveraging Human-Robot Collaborative Systems in Quality 4.0: The Case of Fasteners in Door Assembly	153

43	Impact of Knowledge Management of Lessons Learned in a Consulting Engineering Company	165
46	The Role of GenAI Chatbots in Customer Service: an application in a Brazilian Luxury Pool Company	173
47	Fault Analysis in Self-Aligning Roller Bearings Using Machine Learning Techniques with kNN and Decision Tree Algorithms	186
48	Maturity of Industry 4.0: Case Study of a Maturity Model Applied to a Two-Wheel Automotive Company in the Manaus Free Trade Zone	200
51	MANAGEMENT MODEL 4.0 FOR PLANNING AND CONTROL OF PRODUCTION IN THE “INDUSTRIA LICORERA DEL CAUCA”	214
52	Adoption of New Project Management Methodologies in Developing Countries	216
53	Information Modeling Using Asset Administration Shell for Legacy Manufacturing Systems	230
58		241
73	Development of a Low Pressure Dense Phase Pneumatic Conveyor for Friable Products	249
75	Smart Maintenance with IoT and Artificial Intelligence: A Case Study on Slat Conveyors in the Automotive Industry	259
76	Developing a reprogrammable structure for RFID routing using Node-RED	273
78		282
79		293
80	Improving Fresh Egg Waste Levels In A Lima Warehouse Of A Producer And Distributor Company Using Lean Six Sigma Tools And EOQ Method	300
81	Understanding the Robotic Manipulator RV-2AJ for future viability study of integration into a Legacy FMS Digital Twin application	316
84		328
85	Efficient Setup Reduction Strategies	335
86	Operations Management in Servuction Systems A Systematic Review of the Literature: A Case Study in the Health Sector	345
88	Using De-characterized TV BOX in Industry 4.0 Applications	360
89	Production Of Polyhydroxybutyrate Bioplast From Bellaco Green Banana Waste As A Carbon Source Using Xyz Bacteria	371
90	Productivity Improvement In The Glass Enameling Process Of A SME Using 5S And SLP	384
91	A Proposal for Production Control of Legacy Flexible Manufacturing Systems using Asset Administration Shell and Digital Twin	403
92	Implementation of sustainable business models: a literature review	415

93	Interaction of The Fourth Industrial Revolution with Lean Manufacturing Techniques: Impacts on Organizational Management	428
94	Edge-based Microservice orchestration using Node-RED for Process Control in Industry 4.0	444
95	Autonomous Vehicles and AI System for Cactus Disease Detection: Case of Opuntia ficus-indica and Cactoblastis cactorum	456
111	Big Data in Textile Product Development: Application Model, Benefits, and Challenges	470
112	A Structured Framework for Decision Support System Implementation: A Case of Digital Transformation for District Administration in India	481
113	Enhancing Organ Utilization in Brazil: Managerial and Process Improvements from an International Expert Panel	493
114	Application Of Lean Service To Increase The Productivity In A Micro And Small Enterprise In The Food And Beverage Sector	502
116	Analyzing the Scalability of Autonomous Guided Vehicles in Dynamic Classical Warehousing Environments for the GTS Systems	513
117	The Influence of Industry 4.0 on the Lessons Learned Process in Project Management	524
118	Integrated Maintenance Planning, Process Quality and Production Scheduling Optimization	541
119	Quantitative Risk Analysis for Financial Feasibility of Cellular Tower Construction using Value at Risk Method	552
120	Optimizing Load Utilization and Routing Efficiency in CVRP: Varying Vehicle Capacity Case in the Automotive Industry Closed-Loop Supply Chain	563
121	The Need for Comprehensive and Modern Public Transportation in Indonesia	575
122	IMPROVEMENT IN A GARMENT SME USING 5S AND ERGONOMICS TO INCREASE PRODUCTIVITY AND REDUCE THE RISK OF DEVELOPING OCCUPATIONAL MUSCULOSKELETAL DISORDER	587
136	Exploring Urban Mobility in NCR: A Study on Ride-Hailing App Satisfaction	600
137	Developing a Multivariate Time Series Forecasting Model to Estimate the State of Drone Battery	611
140	Proposal to Reduce Waste in the Cake Production Process Using Standard Work and 5S	623
141	The Impact of Culture on Organisational Development at a large retailer in South Africa	636
142	Assessing the training skills requirement for implementing Industry 4.0 technologies in the manufacturing sector	642

143	Designing of an automated platform for workforce scheduling optimization under Demand Uncertainty	649
144	Assessing Ergonomics Interventions at an Automotive Manufacturing Plant in South Africa	650
151	Application of SLP, EOQ and Demand Management to Increase Turnover in a Manufacturing Company	656
161	The Strategic Role of Operations and Supply Chain Management: A Pivotal Discussion and Research Agenda in Face of Tariffs Trade War Turmoil	667
172	Development of a Framework to Support Tool Selection in the DMAIC Method, in Lean Six Sigma	677
173	Zombie Attack: A Simulation Game for Teaching Production Line Balancing	688
174	Teaching the Bullwhip Effect through the Online Beer Game: A Practical Approach to Supply Chain Dynamics	694
175	Automated Visual Inspection Using Artificial Intelligence for Quote and Quality Analysis in Electrolyzer Renovation	703
177	The Integration of Active Methodology with Gamification in The Teaching of Production Engineering	710
195	Enhancing Business Operations: The Role of Psychosocial Safety Climate and Organisational Citizenship Behaviour in Managing Employee Stress	718
196	Determinants of State-Level Innovation: A Predictive Model for Patent Generation in Mexico's 32 States Over Two Decades	719
