

Table of Content

7th African International Industrial Engineering and Operations Management Conference

Cape Town, South Africa, May 13-15, 2026

ID	Title
2	AI-Driven Regulatory Frameworks for Intelligent Mineral Resource Management: A Research Agenda
3	Semi-Automating Quality Testing Using Machine Learning: A Case Study of a South African FMCG Company
7	Multi-Response Optimization of Precipitation Hardening Variables for Al-Zn-Mg-Sn Alloy as Sacrificial Anode: A Desirability Function Approach
9	Productivity Improvement in a Toilet Paper Processing Company Applying SLP, Standardization and Planned Maintenance
10	Production Management Model based on Standardization and Autonomous Maintenance to improve Efficiency in an LPG filling plant
11	Improving On-Time Delivery in a Metalworking Company through: 5S, SMED and Jidoka
13	Increasing the Rate of Orders Delivered on Time by Applying Work Standardization and 5s In a Metalworking Company
14	Developing a Performance Management Scorecard for Private Secondary Schools in the eThekweni Municipality
15	AI-Driven Administrative Automation in Internal Logistics: A Framework for Adoption and Organisational Transformation
16	The Implementation of AI Assistants to Reduce Redundant Administrative Tasks in Team Operations
21	Rethinking Technostress in the Digital Mobility: A Conceptual Review of Mobile Work Systems among Knowledge Workers
24	Supplier Quality Enhancement and Delivery Reliability in Aerospace Manufacturing: A 4IR Technologies Case Study of Aerospace Company
27	An Assessment of the Economic Impact of Green Buildings in the South African Construction Industry
28	An Assessment of Workers' Attitudes Towards Safety in the Kwazulu-Natal Province: A Systematic Review
32	Sustainable Procurement for Corporate Organizations When Incorporating Small Medium Enterprise Using Competitive Global Strategies in Gauteng, South Africa
34	An Overview: Applying Blockchain Technology to Improve Traceability in Manufacturing
36	Towards Sustainable Asset Modernisation: An Energy Management Systems (EMS)-Based Integration Framework
37	Managing the Transition to Digital Radio Networks in Smart Grids: An Asset and Change Management Case Study
38	Assessing Construction 4.0 Awareness, Adoption Barriers, and Benefits in the Eswatini Construction Sector

42	Implementation of Cleaner Production Methodology for Reduction of Energy Consumption and Waste Sand in Foundries
43	Operational Risk Integration for Regulatory-Driven Export Sustainability: An Operations Management Study of the South African Citrus Supply Chain
44	Leadership-Driven Operations Management for Sustainable Mining: A Review
45	Determining Short-Form Video Key Characteristics that Affect the Private and Public Tertiary Students' Cognitive Engagement in Classroom Learning
48	Mathematical Modelling and Fractional-Order Analysis of Zika Virus Transmission Dynamics with Vaccine Acceptance and Public Awareness
49	Enhancing Road Safety Infrastructure: An Intelligent Aerial Traffic Observation and Automated Citation System
50	Applying Operations Research Techniques Based on Heuristic Algorithms for Optimal Supplier Selection
61	Optimization and Techno-Economic Assessment of Hybrid Renewable Energy Systems for Precision Agriculture: A Review of Tools, Algorithms, and Sustainability
62	Improvement of the OTIF Level of Lubricant Distributor Company through Poka Yoke, ABC And SLP Analysis
63	A Data-Driven Model for Forecasting Cost and Schedule Overruns in Infrastructure Projects
64	Transforming South African Public Healthcare: A service Provider's Perspective- A Case Study of Haterbeeskop Clinic
65	Application of Smart Technology, IoT, GIS And AI in Sustainable Critical Minerals Development
66	Application of AI and GIS in Wastewater Treatment
67	Generation of Heavy Metals Contaminants in the Mining Sector and Impact on the Environment
68	An Assessment of Environmental Challenges and Opportunities for Minerals in the Energy Transition
69	Environmental Impacts for Potential to Produce Battery Materials from Waste Biomass
70	Evaluation of Modelling Techniques for Colocation Data Center Selection
71	Effect of Process Parameters on Quality of Needle-Punched Nonwoven Components for Automotive Applications
74	AI-Driven Slotting Strategies and Picking Productivity in Distribution Centres: A Systematic Review
75	Accelerating Digital Transformation Through Adaptability
78	Customer Retention in Digital Commerce: A Systematic Review of Frameworks, Methods, and Engineering Design Implications
79	Analysis of the Road Discipline Adherence Behavior for Filipino Motorcycle Riders through Multiple Regression
80	Integrating Water and Energy Usage in Airport Performance Management
81	The Integration of Technology and Human Activities During the Structural Forensic Engineering Process
82	Seaport Performance Indicators and their Macroeconomic Spillovers: An SLR

83	Evaluating Effective Project Management Strategies for Sustaining Market Competitiveness within the E-commerce Industry
84	An SLR on the Implementation of Industry 4.0 Within the South African Automotive Industry
86	Multi-Objective Optimization of Hybrid Renewable Energy Microgrids with Robust Dispatch under Solar and Wind Variability and Demand Response Integration
87	Robust and Resilient Multi-Objective Dispatch of Hybrid Renewable Microgrids Under Extreme Solar and Wind Uncertainties with Integrated Demand Response
89	The Analysis of Logistics Strategies to Reduce Product Damage During Transportation: A Case of Takealot
92	Experimental and Kinetic Study of CO ₂ Absorption in a NaOH Spray Dryer System
93	Techno-Economic Feasibility Study of a Solar Photovoltaic System with Battery Backup for Commercial Applications
94	Sustainability and Cost-Effectiveness Assessment of Solar PV Systems: A Case Study of Western Cape, South Africa
96	Brain Rot or Relaxation? The Impact of Short Videos, Attention Fragmentation, and Emotional Desensitization on Senior High School and College Students' Cognitive and Psychological Health
97	Enterprise Resource Planning Lifecycle Management and Implementation – A Systematic Literature Review
99	Exploring Consumer Readiness and Satisfaction in the Adoption of QR Ph Standard
102	Evaluation and Comparison of Occupational Stress and Cognitive Workload of Staff Nurses in the Inpatient Department between Level 3 Public and Private Hospitals
103	Factors that Influence the Compliance of Motorcycle Delivery Riders in Metro Manila to Road Safety
106	Critical Success Factors for Lean Six Sigma Sustainability in Manufacturing: A Longitudinal Capability Development Perspective
107	Examining the Drivers of Digital Purchase Intention in the Philippines Through Multiple Linear Regression Analysis
110	Implementation of Process Standardization and Demand Forecasting to Increase Inventory Turnover in a Peruvian Textile Company
111	Laser-Wire Additive Manufacturing: A Review of Applications and Research Gaps
112	Evaluating The Impact of Production Challenges on Quality in The Automotive Manufacturing Industry in South Africa
115	Barriers and Enablers of Sustainable Smart Manufacturing in Resource-Constrained SMEs
117	Transitioning Firms to a Sustainable Ecosystem
120	Student Barriers for Transitioning a Curriculum Delivery Grid in a Distance Education Setting
121	Improvement of Logistics Service Level through 5S, ABC Classification, SLP and LPS in the Real Estate Logistics Area
122	Application of 5S and SMED to Improve Productivity in PET Flake Production in a Peruvian Textile Company

124	Improvement Model to Increase Operational Efficiency in a Pizzeria Using SLP, TOC and 5S
125	Towards Sustainable Filter Production: Manufacturing Practices and Operational Improvements
127	The Impact of Mean Time to Repair on Overall Equipment Effectiveness: Evidence from a Food Manufacturing Facility
128	Simulation and RETScreen-Based Assessment of a Solar-Wind Hybrid System for an off-grid Facility
129	Application of an Adaptive Results-Driven Curriculum[A case of ODeL engineering tuition]
130	Enhancing Order Fulfillment in Electric Motor Gate Manufacturing: A South African Simulation Study
132	Prioritizing, accelerating, and scaling up green energy infrastructure development for industrialization and socio-economic growth-case study: East African energy sector.
133	A System Dynamics View of the Influence of Industry 4.0 on Engineering Technology education in a VUCA world: A causal loop diagram perspective
135	Adaptive Protection Scheme for Enhancing System Protection in Distribution Networks with Distributed Generation
139	The Role of Governance and Institutional Management Capacity in the South African Agricultural Cooperatives
141	The Logistics Performance Indicators 2.0 Framework: Differences from the Traditional LPI and Implications for Türkiye
156	Service Level Improvement through TPM and EOQ Model in a Fumigation Company
157	Leadership and Sustainability in the Manufacturing Industry: A Progressive Model
159	Lifecycle-Based Maintenance Optimisation for Aging Mining Assets
164	The Mediating Role of Total Quality Management in Enhancing Supply Chain Integration and Its Impact on Sustainable Performance in the Manufacturing Industry
168	HybridNet-SCR: Network-Aware, Constraint-Guided Multi-Agent Control for Disruption-Resilient Supply Chains
170	The Impact of Weld Quality Analysis in the Automotive Supply Chain in South Africa
174	Exploring Opportunities for Artificial Intelligence Integration in Small and Medium Enterprises in South Africa
176	Scroll, Shop, Repeat: An Analysis of the Psychological and Behavioral Drivers Influencing Purchase Intention Among Filipino Digital Consumers in NCR
177	The Design of a Hydro Docking System for a Small Town Harbour
178	Smart Solar Street Lighting Systems for Resilient Urban Infrastructure: An Industrial Engineering Approach to Cape Town's Energy Security
179	Analyzing the Factors Influencing Customer Decision to Revisit Coffee Shops: A Combined Analysis Using Service Quality Model and the Theory of Planned Behavior
180	Artificial Neural Network Regression-based Modelling of a Charging Solid State Hydrogen Compression Unit
181	A Performance Analysis of a Commercial Filling Station using ARENA Simulation: A South African Case Study

182	Assessing Service Quality, Perceived Risk, and Value: Predicting Continued Usage of Modern Jeepneys among Commuters in the National Capital Region
183	Identifying Context-Relevant Factors for Addressing Delayed Payment to Contractors in the Construction Industry: A Case Study
184	Modelling and Performance Evaluation of Precast Concrete Segments Production Using Discrete-Event Simulation
186	Comparative Analysis of Forecasting Accuracy and Training Dynamics of the Multilayer Perceptron for Demand-Responsive Energy Management
189	Optimization, Design and Analysis of Steering Knuckle Component tailored for Nigerian Roads
190	Optimization And Analysis of a Single-Cylinder Four-Stroke Engine Crankshaft for A 3-Wheeler Vehicle
192	Assessing the Impact of Professional Registration on Ethical Standards among Built Environment Professionals
193	Predicting Machine Failures and Failure Modes Using Supervised Machine Learning Techniques
195	Optimisation of Medical Device Design Transfer Procedure
196	Application of an Integrated Lean–DMAIC Framework with Automation for Cargo Offloading Cycle Time Reduction: A Logistics Case Study
197	Biomethane Market and Future Prospects
198	Developing an IoT-enabled Hospital smart workspace
199	Determinants of Trust and Adoption in Human-Robot Collaboration: An Industrial Perspective
200	Integrating Cyber-Physical Systems in Manufacturing: Challenges and Future Directions
202	Smart Grids and their Role in Smart Mobility
203	Plastic Wastes to Energy Pathways
204	Developing Adaptive and Resilient Manufacturing Systems Through Smart Technology Integration
206	Big Data Analytics [A case of Healthcare Operations in SA]
208	Energy Harvesting from A Typical Wastewater Treatment Plant
209	Energy Sustainability Through Generation Decentralization
210	Sustaining Collaboration in the Public Sector: A Conceptual Discussion of Stakeholder Engagement and Compromise Dynamics
211	Adaptive Learner Progression and Support for At-Risk Engineering Students in Odel
212	Comparative Evaluation of Adaptive Traffic Signal Control Using HCM, SIDRA, and Simulation-Based Models
213	An Integrated Production Planning and Quality Control Framework for Job-Shop Manufacturing: A Case Study of a Precision Machining SME
214	Factors Affecting Commuters on the Usage Intention of MRT-3 in EDSA, Philippines: A PLS-SEM Approach
215	Maintenance Protocols for Improved Operational Efficiency: A Performance Review on Rail Operations' Systems

216	A Development of an Agile Supply Chain Network Model
217	Application of a proactive workplace risk management strategy
218	Engineering Education in Zimbabwe: Challenges, Progress, and Future Prospects
219	Investigating the Role of Continuous Quality Improvement in Shaping Agile Service Organisations
220	Digital Competencies for Pedagogy programs in the new Normal
221	Creating an Artificial Intelligence (AI) Readiness Model to assist South African SMME's to Adopt AI effectively
222	Application of Artificial Intelligence Techniques in Geothermal Energy Management Systems for Improved Performance: A Review
223	A Literature-Based Strategy Framework to Bridge the AI Skills Gap in South African SMMEs and Improve Operational Efficiency
224	Determining Factors that Can Significantly Affect the Achievement of Student Outcomes in the University of Santo Tomas Engineering Student Internship Program
225	Optimizing Reverse Logistics in Aluminium (An Industry Specific case in South Africa)
226	Disruptive Technologies Enhancing Learners' Experience in Teaching and Learning
228	Cogeneration vs. Conventional Thermal Power: Performance Assessment and Rankine Cycle Design at Kipevu III and Rabai
231	Comparative Life Cycle Assessment of Bagasse-to-Energy Conversion Pathways for Sustainable Power Generation
232	Hydrometallurgical Recovery of Lithium Metal from Lithium Cobaltate Cathode Active Material of Spent LIBs for the Stationary Energy Storage Systems (SESSs) Applications
258	Application of the Case method in engineering education
262	From Theory to Practice: The Role of Virtual, Augmented, and Mixed Reality in Transforming Engineering Education
263	The Integration of Artificial Intelligence Solutions to Bridge Occupational Health and Safety (OHS) Compliance Gaps in South African Small and Medium Enterprises (SMEs)
269	Optimizing Waste-to-Energy Feedstock Logistics in Ghana: An Operations and Circular Economy Framework
270	Nanotechnology-Based Water Treatment for Rural and Resource-Constrained Environments: A Systematic Review
274	Dynamic Analysis of Hybrid Water and Energy System in Smart Cities
276	The Conversion of Open-Cycle Diesel Power Generation to Cogeneration and Organic Rankine Cycle Plant with Sustainability Assessment
278	Design and Modelling of a Campus-Scale Microgrid for the University of Nairobi
282	Supplier Relationship Management Practices And Performance Outcomes In The Rubber Industry: Evidence From a Developing Economy
284	Evaluating Thermal Performance and Optimization of Power Generation Boilers Using Process Modelling: A Quantitative Analysis of Air Heater Leakage and Coal Quality Effects
285	Integrated Neural Network and Fuzzy Logic Control for Water Treatment Optimization in Power Generation Plants: A Conceptual Framework with Application Case Studies

287	Modelling Plant Performance and Availability Through Maintenance and Workforce Dynamics: A System Dynamics Approach
289	What Drives Supply Chain Innovations in Public Healthcare? Evidence From Tertiary Hospitals in an Emerging Economy Using a Multimethodological Approach
293	Evaluating Challenges in Implementing SDG 7 in Existing Buildings in Johannesburg
295	Finite Element Analysis and Structural Validation of an Automated Eccentric-Shaft Rebar Handling Mechanism for Steel Cooling Beds
299	Green Psychology of Entrepreneurship: A Scoping Review of Biospheric Values, Self-Efficacy and Afrocentrism in Sustainability, Green Systems and Energy
300	Green Customers through Consumer Psychology principles: A Bibliometric Analysis within Quality, Reliability and Maintenance Framework
301	Supply Chain as a Driver of Cost and Sustainability in the Automotive Industry in South Africa
302	Integrating Digital Technologies and Lean Construction for Waste Management in Developing Countries: A Bibliometric Review
305	Implementation of the 5s Method Using a Kaizen Approach to Improve Efficiency in a SME in the Metalworking Sector
313	Modeling and Analysis of Process Parameters Affecting Flexural Behavior of FDM-Printed Wood/PLA Composites
315	Investigating the Relationships Among Employee Well-Being, Absenteeism, and Individual Performance at a Large Financial Services Institution
316	A Risk Management Framework to Support Organisational Performance in the Public Sector in South Africa
317	Life Cycle Impact Assessment of a Solar PV/Fuel Cell/Hydrogen Storage Hybrid Energy System for Seawater Desalination in South Africa
319	Improving Labor Productivity in a Furniture Workshop through an Integrated Ergonomic Assessment Using REBA, NMQ, and 3DSSPP Simulation
320	Evaluation of Undulation Damage through Finite Element Simulation and Experimental Validation
341	Barriers to the Adoption of Building Energy Management Systems in Residential Buildings: A Property Manager's Perspective
346	Practical Application and Implications of Transformative Learning in an Engineering Classroom: Step-by-step Guide to the Ten Phases
347	An Investigation on the Flow Properties of Some Pulverized Nigerian Coals
350	Strategic Management Insights Driven by Cutting-Edge Perspectives in Strategy, Operations, and Governance.
355	Water Desalination versus Conservation
359	A Hybrid Theoretical Framework for Technology Adoption in the Construction Industry
360	Characterization of Manufacturing Downtimes in the Automotive Industry in South Africa
361	An Investigation to Determine the Impact of Defects in Metal Sheets Welding in the Automotive Industry in South Africa

362	The Effectiveness of the Manufacturing Process of Automotive Door Hinges: A Case Study
363	Assessment of the Implementation of Building Energy Management Systems in Residential Buildings: Property Managers' Viewpoint
364	The South African Insurance Industry's Preparedness for Climate Change
378	Leveraging Digital Tools for Forecasting and Monitoring Railway Infrastructure Projects to Improve Project Delivery
387	Assessment of the Adoption of Cyber-Physical Systems in the South African Construction Industry
388	AI-Driven Innovations in Training Delivery and Assessment
390	Analysis of the Influence of Perceived Usefulness, Perceived Ease of Use, Perceived Trustworthiness, Service Quality, and Brand Image on Customer Satisfaction in Using Telemedicine
391	Evaluation of the Potential Implication of Simulation Modeling in Enhancing Maintenance Monitoring and Decision Making of Road Infrastructure
392	Integrating GPR and Geotechnical Investigation for Subsurface Failure Diagnosis: An FMEA and Asset Integrity Management Framework — A Case Study at Obafemi Awolowo University
393	Pedagogical Challenges and Technology Enhanced Learning in an Open Distance Learning Environment
400	A Data-Driven Unsupervised Machine Learning Technique on Bulk Water Distribution Underground Big-diameter Steel Pipelines
401	Organisational Readiness for Digital Technologies Adoption in Health Care Facilities: Bibliometric and Conceptual Review
402	Research and Innovation Ecosystem for Sustainable Development
403	Industry-Integrated Project-Based Learning in Construction Management: Student Reflections and Mentor Assessments as Evidence of Practice-Readiness
404	Exploration of Green Ergonomics Utilising the System Dynamics Approach with the Lenses of 5.0
426	Exploring the utilization of biodegradable polymers in additive manufacturing products
429	Service Configuration Optimization for Canal Boat Transportation Using a TOPSIS-Based Taguchi Method: A Case Study of the Saen Saep Canal, Bangkok, Thailand
436	Adoption of Machine Learning-Driven Predictive Maintenance for Optimal Operational Reliability in Water Infrastructure Systems in Developing Countries: A Bibliometric Review
437	AI-Driven Supply Chain Optimization: Evidence from Digital Logistics Operations
450	Enhancing Construction Health & Safety Through Early Integration of Construction Health and Safety Agents
452	Factors contributed to the poor-quality cost in the XYZ Construction of Transmission Tower Lines
454	The analysis of the cost related to poor quality in the Construction of Transmission Line Towers
462	Two-Line Shrink Aperture Resolution Affected by Primary Spherical Aberration
