Table of Content

4th Australian Conference on Industrial Engineering and Operations Management
(Melbourne, Australia, November 25-27, 2025)

Title
Coverpage
Title
Masthead
Welcome
Committee
Sponsors
Keynote Speakers
Panels
Program
Workshops
Table of Contents

ID	Title	Start Page
2	Categorization and Recycling of Solid Waste Generated by Health Care Entities in Rajshahi City Area	1
3	Effective Consensus Decision Making-Utilising Practical Game Theory Techniques	11
5	Mapping the Cost and Revenue Structure of Circular Economy Business: A Framework Based on LLM-Assisted Scoping Review	12
6	Driving Operational Excellence in Healthcare: The Second Wave of CI Improvement Projects at the University Medical City, Oman	14
8	The Impact of Adopting Smart Contracts and Blockchain in the Construction Industry: A Case of Lusaka, Zambia	15
9	Factors Influencing the Adoption of Photovoltaic Panels as a Method of Sustainable Construction Material: A Case of Zambia	23
10	Reinforcement Learning for Financial Resilience: Optimizing Supply Chain Liquidity Under Uncertainty	30
11	Smart Wearables for Chronic Kidney Disease Management	40
15	Proposal of a Maturity Assessment Approach for the Implementation of an Environmental Monitoring System	41
17	Adaptive Neighborhood Search with Constraint Programming For Hybrid Flow Shop Sequence Dependent Group Scheduling Problems	43
24	Reliability of the Electrical Multiple Unit trainset Maintenance in a Manufacturing Company	44
26	A Manufacturing Model to Enhance Productivity through Applying SLP, 5S, and TPM in a Textile SME	56
27	AI with Data Science for Advanced Cyber Risk and Threat Analytics	69

28	Optimizing Electronic Manufacturing Processes Using Value Stream Mapping: A Case Study	70
30	Application of Business Process Management (BPM) and Lean Six Sigma (LSS) to Improve Productivity in Customer Service in the Insurtech sector: A Case Study	84
33	Engineering Human Capital Retention Strategies in South African Energy Organisations	97
38	AI-Compass: Functional Paradigm-Based Algorithm Selection Framework	110
39	Optimizing Production Planning for Fresh Sandwich Shops Under Demand Uncertainty	119
41	Strategic Planning for Bike-Train Integration: A Comparative Cost Analysis of Strategies Using Continuous Approximation	124
42	An AI-Driven Predictive Maintenance Strategy for Conveyor Belt System In the Food and Beverage Manufacturing	126
57	Using bi-objective linear programming and reinforcement learning to conduct electricity supply optimization	127
59	AI-Driven Innovations in Healthcare: Enhancing Handwritten Digits Recognition	128
60	Quality in the Age of Digitalization – How to Realize the Transformation	130
61	Quality Management Practices in The Context of Industry 5.0	142
62	Factors shaping Quality 5.0 adoption in South Africa: Exploratory Factor Analysis	158
63	System Dynamics Modeling of Employee Turnover Among Canadian Nursing Home Workers	171
64	Applying SWOT Analysis to Examine Quality 5.0 Adoption in the South African manufacturing sector	173
68	A Systematic Review on the Applications of Explainable Artificial Intelligence for Enhancing Transparency and Interpretability in the Supply Chain Management	187
69	Assessing Impact of Environmental Enablers in Digital Readiness for Industry 4.0 in Healthcare: Using a hybrid PLS-SEM and ISM Method	198
70	Application of the WISN Method to Develop a Pharmacist Staffing Framework in a Private Hospital in Myanmar	211
71	Investigating the Effects of Various Handle Grip Designs on the Distal Arm during Short-Term Hand Tractor Field Operation	223
72	Improvement Model to Increase On Time Delivery Applying SLP and MRP Tools in Distribution Company	225
73	Analysis of the Location of Emergency Ambulances in the City of Sorocaba-Brazil Using Generic Data Generation and Clustering Methods	235

75	Blockchain Applications in the Automotive Industry: Opportunities, Challenges, and Pathways to Industry 4.0	247
80	Integrating Human–AI Synergy for Knowledge Ecosystem Transformation: A Socio-Technical Framework for Resilient Innovation	255
91	Aligning Incentives with Outcomes: How Green Procurement Shapes Innovation Quality and Supply Chain Emissions	257
92	Improving Workforce Efficiency in Cold Storage Environments with Autonomous Mobile Robots (AMRs)	259
107	Identifying the Determinant Factors of Customer Satisfaction in Automotive Technology Using the Kano Model Approach	260
111	Risk Simulation of Essential Goods Supply Chains Considering Equity under Panic Buying	272
112	University Lean Adoption: A Systematic Review of Impact and Implementation Drivers	286
113	Digital Automation for Scope 3 Emissions Reporting of Complex Value Chains: A Machine Learning Based Approach	299
114	Reframing the 'Stagnation' Phase in Disaster-Affected Food Supply Chains: An Integrative Review of Control and Recognition Capabilities Across Temporal and Spatial Dimensions	302
115	Unveiling the Overlooked: Challenges and Drivers for Higher Education Institutes in Scope 3 Emission Reporting	304
116	Development of a Database Management System for a Municipal Agriculture Office in the Philippines	307
117	Optimal Cooking Scheduling in Mass Cooking Facilities Considering Hygiene and Operational Constraints	319
134	Analysis of Dynamic Capabilities for Digital Transformation in the Construction Industry	321
136	Drivers of compartmentalization for fire safety in high-rise buildings	329
137	Raising Project Delivery Reliability: An Integrated Baseline Validation Model for Industrial Engineering Using Design Science Research	339
138	Lean Six Sigma for the Optimization of the Operations Area of a Microenterprise in the Alcoholic Beverage Sector	352
139	Exploring Human Behavior and Performance in Virtual Environments Through Engineering Analytics and EEG	367
142	Sustainability In Industry 4.0 Context: A Meta-Analysis Review	368
143	Evaluation of Performance Measurement based Contractor Safety Management System (CSMS) in the Car Manufacturing Industry	369
145	Prioritizing Battery-as-a-Service Operational Strategies using Fuzzy Delphi: Sustainable Mobility Lessons with India-Centric findings and Global EV Implications	386
146	Modelling the Behaviour of Battery Leasing Adoption in Indian Market	406
147	Factors Influencing Battery Swapping Adoption of Electric Vehicles: Using Structural Equation Modelling Approach	418

148	An Immunoinformatic Approach to a Protease-Resistant Epitope Design for a Giardiasis Vaccine	430
149	The Differential Impact of Supplier and Customer Concentration on Open Innovation: A study Based on Resource Dependence Theory and Knowledge-Based View	443
150	Enhancing Operational Performance through Robust Benefit Validation	445
153	Cloud-Enabled Model Predictive Control for Optimized Vehicle Platooning in Urban Transportation	456
154	Exit Facilities and Emergency Preparedness in Academic Space: A Case Study	467
155	Improvement of the Purchasing Process in a Spare Parts Trading Company through Forecasting, Supply Policy and RPA	483
157	Digitalized Workflow Smoothing: Case Study of a Stroke Center	494
159	Unpacking Logistics Capability: A Qualitative Exploration of 3PL Practices and Pressures in Indonesia	507
160	Human Dynamics in Village Governance Performance: Insights from Village Governments in Indonesia	518
161	Reinventing or Refining: Firm Strategies in Response to Entity List Policies	531
162	Genetic Algorithm with The Square Mutation Method for Fair Load Distribution and Resource Assignment in Nurse Scheduling at a Pediatric Intensive Care Unit	533
165	A Discrete-Event Simulation Approach to Analyzing Congestion in a Fitness Facility	543
169	The Time-Dependent Electric Vehicle Routing Problem with Time Windows and Parcel Lockers	560
171	Empirical Documentation of Operational Performance Gains from Blockchain and AI Integration: A SCOR Model Analysis of Industry Cases	562
174	Literature Review and Talent Criteria Analysis: A Framework for Developing Indonesia's Digital Workforce to Achieve Export Excellence	580
175	Energy Efficiency in Very Large Gas Carrier (VLGC) by Implementing Combined Energy Saving Device (ESD): Accelerating Pathways to Net Zero Emission 2050	593
176	Project Closeout: Essential but Neglected Practice in Construction Project Management	596
201	People, Process & Technology for Digital Supply Chain Planning - what is holding back Digital Transformation in Supply Chain Planning	606
202	Ultra-fresh Fashion Supply Chains under Tariff Hikes	607
203	A Comparative Analysis of Different Game Genres in the Development of Entrepreneurial Skills	608

206	Crisis Induced Human Resource Practices for Managing Hospital Surge Capacity amidst a Dual Crisis: An Exploration of the Staffing practices	639
207	Influence of exposure to Facebook gambling advertisements on the attitudes and behaviors of undergraduate students in Manila	640
208	Electric Bus Charger Scheduling with Peak Load & Battery Degradation Costs under Mixed-Mode Operation	655
209	A Computational Framework for Integrating DfMA Principles in Timber-Framed Composite Wall Panel Design and Manufacturing	668
211	Enhancing Engineering Management Education: The Impact of Project-Based Learning on Student Self-Confidence and Teamworking Skills	679
212	Designing Sustainable Quality Systems: Moving from Compliance to Culture	687
213	Impact of Vehicle Type and Driving Behavior on Intersection Traffic Management Performance	688
214	Integrating Statistical Analysis into Maintenance Cost Benchmarking for Oil Storage Tanks	699
217	Teaching Quality Management in AECm graduate programs using ISO9004 -- Organisational Sustained Success	712
218	The use of Lean and Six Sigma on a Victorian Infrastructure (Construction) Project	724
219	The benefit of lean and Six Sigma via a Return on Investment (RoI) when utilised in the delivery of infrastructure (construction) projects.	734
220	Building Adaptive and Innovative Engineers through Scaffolded Experiential Learning	743
221	Establishing an Optimised Interface Protocol Between Macro and Micro Planning Systems in Infrastructure Projects: A Proposed Framework for Control and Performance Management	755
222	Leveraging Peer-to-Peer Electricity Trading for Sustainable Infrastructure Development in Australia	768
223	Autonomous Supply Chain Disruption Response Using Multi-Agent AI Systems: A Comparative Performance Analysis	780
224	Implementation of Business Skills and Management Curriculum from Universitas Tarumanagara to Catholic St. Yoseph Senior High School, Denpasar, Bali	789
226	Mapping the Technical and Behavioral Competencies of Production Engineers in Industry Era 4.0: Evidence from Brazil and an International Perspective	790
242	Cost-sharing or R&D joint-venture: The role of green process innovation for recycling under cap-and-trade regulation	801
252	A Model of the Influence of Supply Chain on Management that Implements Innovation to Achieve Project Performance in Labuan Bajo	803

254	Feasibility Analysis of Villa Infrastructure Investment Considering Market Risk and Operational Risk in the Pecatu Area, Bali	804
