

Table of Contents Table of Content

10th North American Conference on Industrial Engineering and Operations Management
(Orlando, Florida, June 17-19, 2025)

Title
Title
Masthead
Welcome
Committee
Sponsors
Keynote Speakers
Panels
Program
Table of Contents

ID	Title	Start Page
4	Industrial Energy Management and Sustainability Using Phase Change Materials	1
6	Applications of additive manufacturing techniques and material selection investigations for fabrication of prosthetics and orthotics devices.	7
8	Adapting Supply Chains with Industry 4.0: Insights from the COVID-19 Crisis	19
10	Determinants of SMEs' Customer Retention: A Relationship Marketing Perspective	30
23	Scrap Rate Reduction for a High-Volume Aerospace Bearing Ring Using DMAIC Methodology	31
24	ANTECEDENTS OF HINDSIGHT BIAS OF INVESTORS AS SEEN THROUGH THE EYES OF STOCK MARKETs BROKERS	41
26	Statapult Catapult DMAIC Project	42
28	Reducing Resolution Time for Key Malfunction Defects Using Six Sigma DMAIC Methodology	55
29	Statapult Performance for Achieving Target Distance	66
30	Optimizing Performance of the Statapult® Device Using Lean Six Sigma	78
34	Optimizing LPG Cylinder Delivery Duration Using Six Sigma Methodology	94
39	Enhancing Cardboard Box Recycling in E-commerce: An Innovative Approach for Amazon	104
40	Investigating the Measurable Factors Influencing Variability in Apple's iPhone Annual Sales Performance	114

42	Using the IRMC-V Framework to Bridge Risk Management and Customer Success to Maximize Software Project Outcomes	134
56	SUPPLY CHAIN MANAGEMENT PRACTICES AND ORGANIZATIONAL PERFORMANCE OF MANUFACTURING SMALL AND MEDIUM ENTERPRISES (SMES) FROM AN EMERGING ECONOMY. THE MEDIATING ROLE OF SUPPLY CHAIN PERFORMANCE	142
61	Redesign of the Handle of Painting Tool of construction painters.	143
62	Hybrid Quality Management Systems: Integrating Traditional and Digital Approaches for Smart Manufacturing	152
63	From Silos to Synergy: Driving Quality and Performance Through Cross-Functional Teams	168
65	Tracking the Unseen: Autonomous Multi-Object Motion Analysis in Complex Environments	179
66	Bridging the Black Box: Data Mining Enhanced Machine Learning Interpretability for Exoplanet Discovery	191
69	Humanising postgraduate education: Exploring key success factors at a Higher Education Institution from the postgraduate student's perspective	202
70	Enhancing Productivity and Safety in Manufacturing through Cognitive Ergonomics Using AI for Adaptive Systems	212
71	Microprocessor-Based Simulator for the Study of Wind Speeds as a Function of Ventilator Position in a Model Building	224
73	Evaluating Innovation Diffusion of Digital Twin Adoption for Enhanced Quality Control in Saudi Arabia's Industrial Sector	236
75	Critical Path method and Economic Analysis for implementing an intelligent Accidents management system in Bisha, Saudi Arabia.	238
77	The Roadmap to Successful Implementation of 7S in the	251
78	Evaluating Circular Packaging in Online Retail:	261
79	Improving Productivity of Work Integrated Learning by the	269
80	Tokenization in Industry 4.0: Exploring Use Cases, Strategic Implications, and the B-FIT Framework for Digital Transformation	279
82	A Computational Framework for Vaccine Selection: Comparing MEREC and CRITIC Weighting Techniques.	287
83	Simulation and Analysis of a Pharmacy Prescription and Vaccination Processes	289
84	Supply Chain Strategies and Operations Performance of Firms: The Mediating Effect of Firms' Financial Position	290
85	Simulation Modeling and Analysis of Autonomous Vehicles in a Manufacturing Environment	302
86	Quantifying Worst-Case Supply Chain Carbon Footprints: A Network-Based Approach	309

88	An Epidemiological Mixed-Integer Nonlinear Programming Framework for Vaccine Modeling and Patient Allocation During Pandemics	319
94	Sustainable Solar Panel Cleaner: Optimizing Renewable Energy Through Automated Design	321
96	PurePals	332
97	Versa-haul: A Versatile Solution for Everyday Transportation	341
98	Automated Robotic Assistant	342
100	Sustainable Telecommunications: A Portable, Solar-Powered Balloon for Remote Connectivity and Disaster Response	343
101	Entrepreneurial-Minded Postdocs in High-Tech Startups: Their Industry Chances and Success	353
105	Assessing Container on Barge Readiness within Maritime Transportation Systems	359
106	Integrating Lean Manufacturing and Energy Management for Sustainable Efficiency	361
107	Digital Supply Chain Management Transformation - A New Approach to Making Sense of Advanced Technologies to Improve Supply Chain Management	363
108	Towards Intelligent Detection of Android Remote Access Trojans (RATs)	364
109	Evaluating the Capabilities of LLMs in Security Analysis for Mobile Applications	366
110	An Integrated Decision Support System (DSS) for Sustainable Supplier Selection, Evaluation, and Benchmarking Using a FIS Approach	368
111	The main challenges lie in the adoption of industry 4.0 technologies by manufacturing companies in Cameroon: an exploratory study	381
112	Ensemble Machine Learning for Healthcare Data: A Comparative Analysis of Chronic Kidney Disease and Cardiovascular Risk Prediction with NHANES Data	389
113	Scope of Ergonomics: Case Study of Academia and Industry in Bangladesh	403
115	Redesigning Industrial Engineering Education: A Strategic Plan for Modernization at UFRGS	413
116	Exploring operational challenges related to quality control and customer satisfaction in South African transportation and logistics SMMEs	426
117	Bridging Academia and Industry: Development of Requirements Engineering Competencies through Project-Based Learning	427
118	A Conceptual Framework for Integrating Exoskeleton Technologies in Healthcare	438

119	Sampled-Data Control Approach for Unmanned Ground Vehicles Using RTK Sensors	439
120	Advancing Connected Automated Vehicles: AI Techniques for Traffic Optimization and Safety	445
126	Continuing education in management system standards in Peru (2015-2024): factors affecting academic performance	446
127	Systematic Review of AI and Non-AI Approaches for Personalized Learning Paths	456
128	Enhancing Manufacturing Efficiency Through Digital Twin Implementation	468
129	Aerodynamic Design Optimization and Biomimetic Integration with AI for Rocket Vehicle Development	469
130	Customizable Campus Navigation System	481
131	Exploring Semantic Learning in Natural Language Processing: Bridging Meaning and Machine Understanding	483
133	Analysis of Kaizen Projects in an Assembly Line and Warehouse of an Electric Motor Manufacturing Company	492
134	Leveraging Lean Six Sigma Principles for Operational Excellence In Radiology Workflow Optimization	494
135	Multi-Objective Simulation Bed Resource for Emergency Admitted to Hospital	496
136	Ensuring Data Privacy in AI-Driven Educational Platforms	498
140	Driving Operational Change for Small American Manufacturers: A DILO, Work Instruction, and Audit Approach at Elektro Assemblies	499
141	Enhancing Supply Chain Efficiency in Agribusiness through Machine Learning Algorithms	512
143	Towards Agriculture 5.0: An IoT Framework for Precision Farming	527
144	Data-Driven Analytics for Manufacturing and Healthcare	542
146	Agent-Based Simulation modeling of crowds based on collective intelligence genome	543
149	Facilities Integrity Management System – Production Best Practice pragmatic case studies for improving Production Operations in the Energy Sector	545
150	Risk Assessment and Management - Production Best Practice Case study for improving production Operations in the Energy Sector	555
154	AI-Driven Platform Architecture for Business Plan	564
155	Last-Mile Delivery in High-Density Emerging Economy Cities Using Crowd-Generated Data and Artificial Intelligence	565
159	Assessing the Maturity Level of Obsolescence Management in the Quebec Aerospace Industry	566
161	Cost Optimization in Mold-Making: Conceptual	579
162	Similar States, Similar Solutions? LLM-based Identification of Similar Capital Funding Policies in K-12 Schools	588

163	DEFOCUS ANNULAR APERTURES AT $\epsilon = 0.3$	590
164	Performance Evaluation and Optimization of Ethanol Fermentation in Batch vs. Fed-Batch Reactors	591
165	A risk management approach to the management of road deterioration on the National Route 12 between Beaufort West and Klaarstroom, Western Cape, South Africa	603
187	Optimal Preventive Maintenance Policy for A Wind Turbine Gearbox Subject to A Minimum Required Full Capacity Operating Rate	610
188	Validation of A Single Camera Motion Analysis System for 3D Knee Kinematics in Vertical Jump	620
189	Assessing Skills Needs for Industry 4.0 in Manufacturing	630
191	Optimal Operation of Vending Machines	640
192	Navigating Hesitant Adoption: Unveiling Barriers And Enablers For Generative AI Adoption By Mid-Level Leaders	653
193	A Capacitated Set Cover Formulation for Vertiport Location and Air Taxi Allocation	655
194	The Role of Human Factors and Ergonomics in Evaluating Employee Well-Being During Digital Technology Implementation: A Systematic Literature Review	666
195	Measuring the Impact of Rushed Delivery on Cost of Quality	682
201	Introducing Smart Asset Criticality (SAC) and How it Differs from Conventional Asset Criticality	683
202	Dynamic Simulation Tool for the Analysis of the Effects of Man-Machine Ratio on the Productivity of Test Manufacturing of a Semiconductor Company	685
203	Optimizing Workplace Productivity and Health Through Improved Lighting: A Case Study	698
205	Smart Compact At-Home Crusher to Promote Environmental Sustainability	704
207	Laplacian Kernel Ridge Regression for Novel Non-Linear Battery State-of-Health Estimation in Electric and Hybrid Vehicles	716
208	AI-Based Solutions for Optimizing Lane Change Safety in Connected Automated Vehicles	728
209	IMRT treatment planning under dose uncertainty: A polyhedral and quadratic programming optimization model	738
212	Smarter Airports Start with Smarter Reviews: An LLM-Based Framework for Automating Airport Service Quality Analysis	752
214	Virtual Reality Leadership Simulation For Introverts: Literature Review	765
216	Development of Agentic Workflows with LangGraph for Software Development Life Cycle Automation	776
217	CONCEPT.IO: Open-source Arena for Academic CONOPs Experimentation of Robotics, Models and Digital Twins	784

219	Optimizing Circular Economy Strategies for Sustainable Maritime Logistics: A Case Study on VINCI Energies and Port Tampa Bay	796
220	Key factors of Industry 5.0 that impact the perception of its implementation in companies in the metropolitan area of Nuevo LeÃ³n	805
221	Designing and Optimizing Autonomous Delivery Systems through MBSE and Discrete-Event Simulation	807
223	Application of Bayesian Price Clearing Auction Model in	821
225	AI-Driven Computational Simulation for Enhancing Resilience in Agri-Fresh Food Supply Chains	828
246	Preliminary Modeling of Cyber Attackers in Microgrids: An Agent-Based and System Dynamics Approach Enhanced with Statecharts	839
247	The Synergy of Cyber-Physical Systems and Digital Twins in Enabling Industry 4.0	840
248	Digitalization in African business management: a necessity	850
250	Contingency Factors Influencing the Use of Accounting Information in Decision-Making: Evidence from Cameroonian SMIs	858
252	Evaluating the Adoption of Metaverse in Medical Training	870
253	A Greedy Heuristic for Scheduling Hybrid Medical School Courses with Metaverse Integration	872
255	Integrating Objectives and Key Results (OKRs) and Key Performance Indicators (KPIs) in Supply Chain Performance Management	874
256	Lean Six Sigma Black Belt Training for Professionals:	886
258	Integration of Artificial Intelligence and Kano Model: A Systematic Literature Review	896
259	Failure of Hemp Fiber Reinforced Composite Laminates	909
260	Model For The Improvement Of The Approval System For The Optimal Allocation Of Customized Products To Masters In The Industrial Sector.	911
261	HFN Meditation Leads to Efficiency in Any Profession	924
263	Consumption and Runtime Automatic Software Performance Optimization on Android Smartphones	925
264	Comparison on the use of Hybrid and Plugin Hybrid Electric Buses for Sustainable Urban Transportation “ Split Use Case	926
265	Enhancing STEM Education with AI: Fostering Soft Skills and Inclusion	927
266	Sustainability of Industry 4.0/Smart Manufacturing	928
267	An Analysis of Water Supply System Losses: A Case Study of Santa Catarina State, Brazil	935
268	AI-Powered Chatbots to Optimize the Food Waste	937
269	BayesIntuit: A Neural Framework for Intuition-Based Reasoning	938
270	Revamping Agile Logistics for Emergency Management	951
272	Enhancing Multi-Echelon Home Improvement Supply	952

274	Performance Assessment of Haptic Gloves in VR Training Applications Implications for Engineering Education	953
276	A Systematic Review of the Literature on Operations Management in Servuction Systems: A Case Study in the Hospitality Sector	960
277	INTEGRATION OF SYSTEM DYNAMICS AND AGENT-BASED SIMULATION TO IDENTIFY/ASSESS RISKS IN IoT-BASED SMART GRIDS	976
280	Improving Production Performance Using Virtual Simulation Technologies: A Case Study of the Automotive Industry	977
281	Unlocking Employability: Key Determinants for Industrial Engineering Graduates in Bolivia	990
282	Comparative Analysis of Shortest Path Algorithms using Graph Theory	1004
283	Implementation of Emotion Recognition AI Using CNN and Voice Recognition Features	1012
284	Low-Resolution Image Reconstruction Using CIFAR-10	1018
285	Comparison of Prediction Accuracy of Logistic Regression and Random Forest in Weather Data Time Series Analysis	1024
287	Integrated Digital Manufacturing: CAD/CAM and Generative Design in Advanced Process Planning	1031
289	IoT-Enabled Demand Forecasting in Supply Chain Management: A Bibliometric Analysis and Future Directions	1046
291	Accelerating Process Improvement with Generative AI	1057
292	Comparing Economic, Social, and Environmental Drivers of Electric Vehicle Sales in the United States and China: A Data-Driven Analysis Since 2008	1058
293	Predicting Tensile Strength in FDM-Printed PLA Parts Using Machine Learning	1071
295	Lean Six Sigma in Radiology	1085
296	RoadSense: Utilizing Artificial Intelligence to Detect Drunk Drivers	1092
300	A Practical Approach to Digital Manufacturing	1107
304	Adaptive AI Models for Safe and Efficient Lane Change in Autonomous Driving	1123
319	AI-Powered Retrofitting for Smart Reverse Engineering: An Approach of NeRF-Based Multi-object recognition in Complex ambience with noise	1124
320	Spiral Design and Simulation-Driven Deployment of a Drive-Through COVID-19 Testing and Housing Check-In System at a Large Public University	1135
321	LLMs Empowering Communities	1136
322	Industrial-Aero Optimization for Agile Rocket Cargo Delivery: Logistics	1137
323	Cognitive Intelligent Decision-Making for Digital Transformation of Reconfigurable Production Systems	1139

324	Ergonomic assessment of working conditions among sewing machine operators in Bangladesh	1152
325	Intelligent Manufacturing Defect Visual Inspection with Temporal Samples: An Approach of Accumulated Knowledge Graph Reasoning with YOLO Stream-based Detection	1169
326	IT Business Maturity Assessment: A Proposed Framework	1182
327	Utilizing Multiple-Server, Limited-Customer Queuing Theory to Enhance E-Jeepney Operations in Quezon City, Philippines	1198
328	Utilization of Queuing Systems: Enhancing Service Efficiency in a Coffee Shop Through Multi-Server, Multi-Customer Flow Process	1210
329	Process Improvement in Restaurant's Commissaries Through Pro Model Simulation	1223
338	Efficient Insolvency Detection in Iranian Banks through Statistical Process Control: A Real Case Study	1235
339	Midpoint Environmental Impact Assessments of Selected Microgrid Systems	1245
340	AI-Driven Traffic Flow Optimization at Intersections Enhancing Efficiency and Safety	1257
343	Sustainability Assessments of Hot and Warm Mix Asphalt Paving Technologies	1266
345	Evaluating the Use of Steel Slag and Rice Husk Ash as Replacements of Aggregate in Concrete: A Sustainable Next-Gen Concrete	1279
346	Logistics Diagnosis of Nanostores in the Metropolitan Area of Barranquilla, Colombia	1288
349	Lean 4.0 and Sustainability: An Empirical Study of Performance Outcomes in U.S. Manufacturing	1301
350	Adaptive Task Token Framework (ATTF): Enabling Robust and Lifelong Multi-Agent Pickup and Delivery	1312
351	Adaptive Predictive Maintenance for Multi-Component Systems Using Ensemble-based Meta-Learning	1325
352	Investigation of the mechanism failures of high temperature components occurring inside Boiler Tubes	1339
354	Frameworks for the New Barrier Areas in Optimising the	1348
355	Remote Work in Public Educational Institutions: An Ergonomic and Organizational Assessment of Its Impacts on Health, Well-Being, and Labor Relations	1360
357	Engineering Education Approach to Develop Sustainability Competencies Using EOP Framework	1369
358	Modeling Technological Enablers for Blockchain in Automotive Supply Chains: A Multi-Method Approach	1370
360	Service Model Based on Lean Six Sigma and Queuing Theory to Increase NPS in a Healthcare Company	1383

371	Blockchain-enabled Information as a Service (IaaS) for Configuration Tracking and Control of Smart Manufacturing Systems	1391
372	Principal Component Analysis Machine Learning Technique On The Underground Big Diameter Steel Pipelines Condition Assessment and Related Data: South African Bulk Water Distribution Utilities	1401
373	Production Model Based on 5S to Increase Productivity in a SME in the Garment Sector	1417
379	Participatory Artificial Intelligence Design in Smart Cities: LLM-Driven Public Sector in China and the U.S.	1427
380	Simulation Analysis and Optimization of a Quality Inspection and Engineering Services Company	1439
386	Placement Prediction System Using Machine Learning and Ensemble Learning Techniques	1441
387	Student Experiential Learning in Advanced Manufacturing	1442
66	Bridging the Black Box: How Data Mining Enhances Machine Learning Interpretability for Exoplanet Discovery	1444
154	AI-Driven Platform Architecture for Business Plan Formulation in Indigenous Communities: A Gender-Focused Case Study in Colombia	1445
161	Cost Optimization in Mold-Making: A Conceptual Industry 4.0 Framework	1446
223	Application of Bayesian Price Clearing Auction Model in Enhancing Transactive Energy Systems Vulnerabilities to Cyber Attacks	1447
256	Lean Six Sigma Black Belt training for professionals: analysis of profiles, projects and academic performance	1448
268	AI-powered chatbots to optimize the food waste reverse supply chain	1449
272	Enhancing Multi-Echelon Home Improvement Supply Chain Responsiveness Through Machine Learning-Enabled Inventory Segmentation and Positioning	1450
77	The Roadmap to Successful Implementation of 7S in the Automotive Industry in South Africa	1451
79	Improving Productivity of Work Integrated Learning by the Application of Lean Principles	1452
354	Remote Work in Public Educational Institutions: An Ergonomic and Organizational Assessment of Its Impacts on Health Well-Being and Labor Relations	1453
