

Table of Content

8th European Conference on Industrial Engineering and Operations Management
(Paris, France, July 2-4, 2025)

Title
Coverpage
Title
Masthead
Welcome
Committee
Sponsors
Keynote Speakers
Panels
Program
Workshops
Table of Contents

ID	Title	Start Page
150	Developing a Methodology for Communities of Expert Facilitators on an Online Platform	1
151	Implementation and Evaluation of the Cultural Synergy Spectrum Method in a Real Case Scenario	13
155	Rapid Development of Information Systems (IS) Artifacts using Design Science Research Methodology (DSRM)	25
160	Enhancing Hazmat Logistics Safety through IoT: A Practical Study Focused on Oman	40
161	Evaluation of Multistage Interconnection Networks Reliability using Monte Carlo Method	51
165	Drivers and Barriers to Digital Technology Adoption in South African Mining: A Qualitative Study	59
167	Examining Greenwashing Through the Lens of the Theory of Planned Behavior	72
168	A Resilient Ecosystem Model to Support Targeted Prevention Plans for Occupational Safety and Health: The PMP 5.0 Project	90
170	Operator Assignment Problem in Multiple Cells Production Systems with Operator Sharing	91
171	Association Rule Learning for Predictive Maintenance in Industry AI	92
173	Governance in Circular Economy: A Critical Review and Way forward	100
176	Impact of Market Heterogeneity on Retailers' Competition for Quality of Services, Price and Location in a Duopoly	112
177	Assessing the Impact of Autonomous Vehicles on Supply Chain Performance – A Case Study of Agri-Food Supply Chain	113

180	An Optimization Model for Periodic Maintenance of Industrial Equipment with Uninterrupted Operation	114
191	Developing the Performance Evaluation Matrix for E-learning System	122
192	A Multi-Measurement Points Evaluation and Improvement Decision-Making Model for Solder Paste Printing in SMT	124
193	A Performance Evaluation Model for the Cable TV Industry Using Quality Loss Function and Gamma Distribution	126
197	Optimization of Electric Vehicle Charging Infrastructure: A Case Study in Jordan	129
198	Comparative Analysis of Machine Learning Models for Predicting Energy Consumption on Last-Mile BEV Routes	136
199	Energy Consumption Estimation in Last-mile Electric Vehicle Routing with Multi-factor Modeling	151
200	Digital Twin Technology for Hospital Bed Management:Data-Driven Comparative Optimization Study	152
201	From Challenges to Solutions: Identifying Challenges in Hydrogen Supply Chain Deployment	161
204	Material Flow Analysis for Agro-Industrial By-Product and Waste Valorization in Advancing Circular Economy Transition	171
216	Effect of Corporate Allegations: Do Supply Chain Partners Face Spillover Effects?	173
217	Comparative Evaluation of Innovation Process Models – Guide for Practical Application	174
218	Systems Thinking of Innovation Dynamic Framework to Analyze the Progression of Innovation Systems	187
220	A Digital Twin for Air Cargo Ground Operations:Connecting the Real with the Virtual	200
222	Sensitivity Analysis of a Metal Hydride Reactor Utilizing LaNi _{4.9} Sn _{0.1} Metal Hydride	213
223	A Process-Based Cost Estimation Model for Metal Spare Parts Production Using Additive Manufacturing	229
224	Enhancing Tire Recycling Supply Chains for Sustainable Waste Management: Insights from a Data-Driven Optimization Study	240
225	Balancing Operating Room Utilization Through Volatility-stratified Surgical Portfolios	251
226	An Investigation of the Sustainability Agenda – or Lack of Same - in Supply Chain Transformation Programs	253
227	Assessing the Interaction between Artificial Intelligence and Carbon Emissions based on the Case of China	265
228	Developing a Framework to Improve Supply Chain Resilience Strategies for Offshore Wind Energy Organizations using a Circular Economy Approach	266

231	Optimizing Assembly Line Balancing with Heterogeneous Learning: A MILP Approach for Task and Worker Assignment	279
232	Minimizing Makespan in Simple Assembly Lines: A MILP Approach Considering Learning and Fatigue Effects	288
233	Optimization of bus dispatching in public transportation through a heuristic approach based on passenger demand forecasting	298
235	Strategic Maintenance Practices and Sustainability: A Theoretical Framework Integrating TPM, RBV, and the Triple Bottom Line	299
238	Innovative Closed-Loop Self-Sustaining Freshwater Cooling Technologies for AC CWP Condenser in The Maritime Industry: A Feasibility Study	312
239	Integration of Water Desalination and Power Generation Using Salinity Gradient Solar Ponds (SGSP) Hybrid Systems and Solar Thermal Systems (STS) in Oman	324
240	A Multi-Fidelity Simulation Optimization Framework Applied to the Pod Sequencing Problem in A Robotic Mobile Fulfillment System	336
245	Management of Processing Systems: A Framework for Operations Management	337
247	Dry Flue Gas Desulphurization using NaHCO_3 and Na_2CO_3 Sorbents in a Fixed Bed Reactor	338
248	Driving Project Excellence: Mindful Leadership and Knowledge Dynamics in Fostering Project Performance. Perspective from Pakistan	349
253	A System Dynamics Model for Evaluating WEEE in Hong Kong	361
255	Insights into System Evolution from a Cross-Case Analysis Using the Model of SGE - System Generation Engineering	373
256	Responsible AI for Patient Care Transitions: Balancing Fairness and Efficiency	386
257	Robust Reconfiguration Planning of Mixed-model Assembly Lines Under Uncertainty	387
258	Optimizing Retail Workforce Management: Integrating Machine Learning Forecasting with Constraint Programming for Dynamic Shift Planning	388
259	Time-GPT and LLM-Based Methods for Enhanced Demand Forecasting in Retail: A Comparative Study	403
260	Remanufacturing Strategies of a Domestic OEM and a Multinational Remanufacturer under Policy Interventions and FDI-induced Technology Spillovers	414
261	Bibliometric Analysis of Barriers to Telework in Industrial Companies	415
268	Spreading digital Servitization in the Machinery Industry Sector: Preliminary Results from an Empirical Survey	431
269	Examination of Contingency Factors in Circular Business Model Implementation in Manufacturing Industry -A Systematic Literature Review	444

270	Policies for Drone-Based Post-Disaster Assessment	446
273	Machine Learning-Based Prediction of Dynamic Braking Torques in Dry-Running Friction Systems - A Data-Driven Approach to Optimize Industrial Brake Systems	447
278	Improving Welding Job Scheduling in Shipbuilding with Optimization Algorithms	468
279	Smart Swaps: Optimizing Rotable Inventory for Exchange-Based Maintenance and Overhaul Operations	480
280	Patient Acuity and Hospital Rooming: Initial Assessment of Acuity-Based Placement on a Medical Surgical Unit	493
281	Toward a Secure and Scalable Vaccine Supply Chain: A Systematic Literature Review of Blockchain, IoT, and Cryptographic Frameworks	503
285	Modelling and Sustainability Index Assessment of Biocomposites Supply Chain Networks Using Bayesian Belief Networks: A Case Study on Hemp-based Pellet Production	518
287	Reduction of Threading Defects in Shaft Manufacturing Using Six Sigma DMAIC Methodology	534
299	Integrating Environmental Features for Green Knowledge-Driven Sustainability	536
301	Sustainable Flying Behavior: Green Economy Class, Sustainable Aviation Fuel, Offsetting, or Taking the Train?	549
302	Assessing and Optimizing Safety Operations in Mining: A Case Study of a South African Mine	559
303	Enhancing Customer Service and Quality in Municipal Water Testing Laboratories through Digital Transformation: A West Rand District Case, South Africa	571
306	The Peril of Channel Integration with Environmental Quality Under Competition Suzhen Liang, Junsong Bian and Adilson Borges, Rennes School of Business, 2 rue Robert d'Arbrissel, 35065, Rennes, France	584
309	Transshipment with Overconfidence	585
311	Case Study: Systematic Approach to Derive Needs Based on Future Scenarios and Personas in the Project C2CBridge	586
313	Applying the Elaboration Likelihood Model to Investigate Customer Behavioral Intention: The Case of Agarwood on Social Media Platforms	600
314	A Case Study of Operational Strategy of a Cocoa Processing Company by Employing the Business Model Canvas	613
316	Platform Bias and Private Label Power: Interactions in Dual-Product Online Retail	626
332	Artificial Intelligence in Supply Chain and Operations Management: Driving Global Sustainability and Positive Business Transformation	627
333	Smart Clothing System (AKS): An Innovative IoT-Based Solution for Kids	628

334	Evolving Competencies and Methodological Preferences in IT Project Management: An Industry 4.0 Perspective	640
336	The Algorithmic Vanguard Unleashed: How Digital-Augmented Agility Rewrites Organizational Intelligence	648
343	Cybersecurity Awareness and Behavior among Faculty and Students in E-learning Environments	663
345	Smart Supply Network Optimization: OR and AI Perspectives	676
346	Sustainable Blockchain-enabled Cut-flower Supply Chain Design to Achieve Environmental Targets; an Integrated Mathematical Model Approach	677
348	Improvement of Productivity in the Jean Pants Line in Textile Through Lean Manufacturing Tools	692
350	Reducing Bottle Height Variation to Enhance Quality, Operational Efficiency, and Revenue	700
352	A Systems Modelling Approach to Sustainability: From Qualitative Insight to Simulation	712
356	Multi-effects Strategic Decisions in the context of Supply Chain Resilience for the Maritime Port System	713
358	Towards Resilient Supply Chain Practices: The Role of Digital Supply Chain Technologies	740
359	Enhancing Road Safety Through Tire Specification Awareness: An Empirical Study Among Commercial Drivers in Ghana	741
360	Greening SMEs in a Warming World: Leveraging Innovation and Sustainable Practices for Resilient Business Performance	742
362	The Role of ISO 9001 in Improving Service Quality at Sobraga's Logistics Department	743
371	Driving Factors for the Application of Quality Management (QM) on Product and Service Delivery in South African Manufacturing Industry	752
372	Impact of Quality Management (QM) on Product and Service Delivery in South African Manufacturing Industry	766
373	Sustainable Benefits of Quality Management (QM) Application on Products and Services Delivery in South African Manufacturing Industry	779
374	A Hybrid Cost-Optimized Maintenance Strategy for Solar-Wind Systems Using Cox Proportional Hazards and Artificial Neural Networks	790
378	Integrating External APIs Into Unity: Methods and Applications	799
380	Enhancing Cervical Cancer Outcome Predictions: A Comparative Analysis of Hybrid Statistical and Machine Learning Models Using Clinical and Genomic Data.	811
381	ImproveXpert4.0: A Big Data-Driven System to Support Continuous Improvement Initiatives and Decision-Making in 4.0 Companies	812

382	Analysis of the Performance and the Behavior of Bass Diffusion Model in Forecasting Demand for Fashion Goods: A Case Study	815
383	Systematic Review of the Literature on Operations Management in Servuction Systems: A Case Study of Cooperative Services	825
387	Towards a Function-based Module Variant Management: An Automotive Case Study	841
388	Building Information Modeling (BIM) to Enhance Stakeholder Satisfaction in Architecture, Engineering, and Construction (AEC) Projects	842
389	What Makes Vietnam more Attractive than Indonesia in the Eyes of Technology Company as Their Investment Destination: Through the lens of FDI Motivation Theory	844
390	The Effect of Interface Language on Task Completion Time in Visual Search and Content Comprehension: A Comparison of English and Arabic	853
391	Success of Business Incubators to Promote Entrepreneurial Practices in UAE	855
392	Critical Enablers of Battery Leasing in Indian Electric Vehicle Battery Infrastructure	856
393	Waste to Wattage: Enablers of Battery Circularity in India's Electric Vehicle Landscape	868
394	Swapping Ahead: Key Enablers of Battery Swapping in India's Electric Vehicle Ecosystem	882
397	Improvement Model to Reduce Picking Errors and Increase Service Level Through Organizational and Logistical Control Tools in a Pharmaceutical Firm	898
398	Optimization Technique of the Philippine Army Warehousing and Inventory System (PAWIS) Using Cloud and Edge Computing: Development of a Strategic Framework for All Units	911
400	Evaluating the Influence of SDG Educational Practices on the CIT-U Industrial Engineering Graduates' Commitment to Sustainable Industrial Development	913
403	Managing the Electronic Waste of Kuwait by Industrial Symbiosis and Reduce-Reuse-Recycle (3R) Applications	929
404	Safety Climate Assessment in the Aviation Industry in Kuwait	930
406	Multi-Period Integrated Procurement and Production Problem for Perishable Products – An Extension of Traveling Purchaser Problem with Integrated Production and Distribution Systems	932
407	Streamlining Supplier Evaluation through Automation: A Lean Six Sigma Approach for Cutting Processing Time	934
408	Investigating Indoor Air Quality in Kuwait: A Study of Bokhour Smoke, Traffic Emissions, and Public Perception	948
409	Simultaneous Reduction of False Positives and Negatives in Strawberry Quality Control via YOLO Computer Vision	950

410	Building Robust Food Supply Chains through Routing Optimization: A Case Study of KDD in Kuwait	952
411	Optimum Shelter Location Problem Using Predicted Injuries	954
413	Testing a Multi-Model Artificial Intelligence System to Detect Ransomware Activity	966
429	Warehouse Optimization for Sustainability: A Case of a Company Supplying Renewable Energy Components	977
430	Specificities and Lessons Learned from Operational Excellence in the Moroccan Automotive Context	991
434	A Structural Path Analysis of Employee Perceptions on Artificial Intelligence Integration at Work	1001
435	Risk Analysis of Wind Turbine Using Machine Learning and AI	1013
436	Improving Military Facility Energy Efficiency Through Preliminary Audit and Conservation Strategies	1025
437	Optimization of the Cocoa Production Chain: Key Strategies for a Stronger Industry in San Martin, Peru	1036
438	Ergonomic Assessment of Manual Loading and Unloading of Wood in Forestry Trucks	1047
441	Impact of Emerging Industry 4.0 Technologies on Supply Chain Management: Advantages, Challenges, and Future Research	1058
445	Driver Performance Analysis: Posture and Ergonomic Impact	1067
446	The Impact of Plants on Indoor Air Quality and Health Effects	1078
447	Evaluating HSE Culture in the Oil and Gas Industry: A Comprehensive Assessment	1087
458	Enhancing Textile Finishing Processes: A Comprehensive Framework Implementation and Impact Analysis	1097
460	Detecting Employees at Risk of Leaving with Prediction Models Based on Machine Learning Algorithms	1112
461	Enhanced Employee Engagement Through Generative AI Assistance: A Combined Technology Acceptance and Organizational Support Model	1113
467	Generic Bills-of-Materials-Operations-Sustainability (GBOMOS) for Reconfigurable Green Manufacturing: A Cognitive Intelligent Reasoning Pilot through Retrieval Augmented Generation (RAG)	1125
469	Smart Robotic Manufacturing Operations with Adaptive Task Planning: GPT-Augmented Multi-Channel Ensemble Learning with Situational Awareness	1139
471	Leveraging Forecasting Model with Machine Learning Approach and Deploying Supply Chain Strategies to Revitalize Business Performance During the 2023 Economic Fall	1150
265	Envisioning Zero-Emission Urban Mobility by 2050: Exploring Hydrogen Vehicles, Alternative Fuels, and Future-Oriented Planning Through Advanced Design	1168

266	Bridging Multiple Valleys of Death in Medical Device Innovation: A Matrix-Based Decision-Support Framework	1185
267	Validation of an Approach to Determine Individual Target Levels of Agility in Product Development	1199
274	Comparative Evaluation of CAD Software for Automotive Front-End Design: A Case Study in Design Efficiency and Usability Metrics	1211
276	The Feasibility of Implementing Cost Reduction Strategies for Green Hydrogen Production in Oman	1223
277	Innovations in Green Hydrogen Production for a Sustainable Future by Oman Vision 2040	1233
283	Optimizing Energy-Intensive Heating Processes in Manufacturing Using Bayesian Belief Networks: A Case Study in Thermoforming	1244
288	A Fuzzy Logic based Approach to the Mixture Design Using Design of Experiments	1257
342	Enhancing Sustainability through Collaboration: A 2TL-DAD Assessment Framework for Sustainable Agri-Food Models	1263
365	Cohesive Governance: A Process-Based Approach for Holding Design and Subsidiary Success Based on Efficient Value Creation	1275
385	AI Design Analysis for Diploma Education in Canada	1290
395	The Monitoring and Control Model of Agricultural Products in the Harvesting Process Utilizes Artificial Intelligence	1304
401	A Network Infrastructure Design Implementation for JPS Interior Designs	1314
412	Service Management Model Based on Lean Service Tools and Ergonomic Design to Increase the Productivity of Cleaning Operations in a Food Court	1325
468	AI-enabled Human Behavior Dynamics in Sociotechnical Manufacturing Systems: A Multimodal Ensemble Transformer	1338
159	Method for Developing a Digital Transformation Maturity Model for the Manufacturing Industry in Latin America	1350
166	Proposing a Framework for New Product Development in a Research and Development Manufacturing Environment	1360
196	A Two-Stage Robust Optimization Approach for Prepositioning Logistics Items in Disaster Management	1376
275	Enhancing Productivity in the RMG Industry Through OWAS-Based Ergonomic Risk Assessment in Bangladesh	1389
