

Table of Contents

3rd GCC International Conference on Industrial Engineering and Operations Management

Tabuk, Saudi Arabia, February 2-4, 2026

ID	Title	Page
16	Harnessing Neuroadaptive Technologies and AI in Personalized Education: The PD AkademiX Approach Towards Resilient Educational Operations	1
18	Impact of Digital Technology in Facilitating Sustainable Growth for SMEs in Nigeria	3
23	Concept Generation and Evaluation Techniques in Product Design	4
26	Small Area Estimation of Class-Specific Proportions in Ordinal Categories Using Mixed Effect Cumulative Link Mixed Models	15
30	New Novel Thermal Insulation and Sound-Absorption Materials Extracted from Agro/medical Waste materials: Toward Green Cities of Zero Waste	17
32	Classification of Spare Parts Criticality: A Multi-Criteria Decision-Making framework with Application in an Oil & Gas Company	18
52	Smart Assistive Cane for the Visually Impaired Using Ultrasonic Sensor and Haptic Feedback	42
59	The Emerging Role of Artificial Intelligence to Improve Inventory Management of Pharmaceuticals Products and Medical Supplies in Gulf Countries	43
60	Smart Irrigation System Using Soil Moisture Sensor for Optimized Water Management	45
68	Enhancing Forecast Accuracy in the Automotive Industry: A Comparative Study	46
74	A Simulation-Supported Integrated Framework for Safe, Efficient, and Sustainable Motorcycle Food Delivery Operations in Saudi Arabia	48
75	Smart Quality Control for Materials and Spare Parts: Integrating RFID with Etras in EV Manufacturing	49
79	A Comprehensive Performance Scorecard for Sustainable Ergonomics Assessment of Textile-based Organizations	61
81	Strategy for the Adaptation of Electric Vehicles in Saudi Arabia Using Fuzzy based Model	84
82	Generative Design of the Car's Front Suspension Lower Control Arm	86
84	Occupational Exposure to Flour Dust and Its Mitigation Through Portable Ventilation: Evidence from a Case Study	96

85	Digital Triage Training, Spatial Optimization and Color-Coded Prioritization: A Simulation Study to Improve Emergency Department Efficiency	109
88	Integrating a Green Lean Six Sigma Framework for Sock Manufacturing Operations in SMEs	121
89	Enhancing Pilgrim Services During Hajj: A Hajj SERVQUAL and SEM Approach	134
90	Impact of The Interplay of Delay Factors and Project Outcomes- An Integrated SEM-Path Analysis and CCAModel in the Madinah Construction Sector	147
91	Integrating Utilitarian and Religious Ethics in Medical Triage: Towards a Comprehensive Ethical Framework	158
92	A Blueprint for Better: Improving Crowd Flow and Safety at Al-Rawda Area in Madinah	166
93	When Emergencies Arise: An Experimental Study of Supply Chain Recourse	174
95	Waste Management and Operational Efficiency Improvement in Cake and Pastry Factory Through Adapting DMAIC Methodology	176
98	Enhancing Resilient Operations via Predictive Maintenance: A Simulink-based Machine Learning Approach for Induction Motor Bearings	191
101	Productivity Improvement in the Picking Process through the Application of Kanban and Inventory Management Approach (WMS) at Drogueria Mefar S.A.C.	192
102	Mechanically Integrous and Cost-Effective Additive Manufacturing	206
103	OPERATIONS RESEARCH IN HEALTHCARE Simulation Modeling of Emergency Department Patient PDI	207
105	National Waste Digital Platform (NWDP): A Digital Supply-Chain Backbone for Circular MSW in Saudi Arabia	208
106	Benchmarking Smart Waste Systems: A Strategic Pathway for Egypt's Circular Economy Transition	218
107	Design of a Smart Solar Energy Management System for Protected Areas in the Kingdom of Saudi Arabia	231
108	From Human Error Reduction to Operational Excellence: Human Reliability Assessment in Metal Casting Operations	243
110	AI-Powered Approach to Data Science: Understanding and Important Factors	244
111	Enhancing Workplace Safety through Smartwatch and Bluetooth-based PPE Tracking	254
112	An Intelligent Mobile Phone Stand for Posture Correction and Musculoskeletal Discomfort Reduction	255
113	Port-Level Network and Resilience Analysis of the Solar PV Module Import Supply Chain in the United States	271

114	Driver Fatigue Detection Using On-board Systems in Connectivity-Dead Regions	283
115	Management Model to Reduce Order Preparation Time by Applying 5S and Standard Work in a Glassworks	294
118	A Comparative Study of LQR and LTR Controllers for Ground Vehicle Lane Change Maneuvers	311
119	Bottleneck Identification and Process Improvement in Outbound Logistics: An Integrated Work Study and Simulation Framework	324
121	Enhancing Warehouse Operations: Integrating Efficiency, Sustainability, and Worker Well-Being.	337
123	Internal Structure Design Optimization for the Truck Tanks to Minimize Slashing Effect	342
124	Artificial Intelligence for Mechanical Property Prediction of Multi-Material Gyroid Structures	356
126	Productivity Improvement in a Bakery and Pastry Premix Company by Applying Preventive Maintenance, SMED and 5' S	366
127	INDEngine Suite: A Modular Platform for Integrated Industrial Engineering Applications	368
128	Automation Adoption in Saudi Arabia's Fashion Retail Supply Chain: The Saudi Abaya	379
129	Parking at University of Tabuk, Saudi Arabia, Problems and Solutions.	388
130	AI-Enabled Autonomous Maintenance and Efficiency Optimization for IoT-Connected VFDs: A Conceptual Framework	389
131	Systematic Review of DDMRP Parameterization: From Planner Judgment to Static and Dynamic Optimization	397
133	Strategy to Accelerate QRIS Payment Adoption in Papua Province with System Dynamics Approach	415
134	Feasibility Analysis of Investing in Single Vessel Ownership Using the Value at Risk Method	429
136	Designing a Smart System for Detecting Leaks in Desalination Water Networks for the National Water Company, Kingdom of Saudi Arabia.	439
137	A Data-Driven Decision Model for Automation in Industrial Systems	450
138	From Data to Decisions: Leveraging Digital Twins, AI, and IoT for Smarter Supply Chain Management	459
139	Integration of Blockchain into Supply Chains: Implications for Saudi Arabia's Vision 2030	461
140	Designing And Manufacturing a Protective and Interactive Helmet for Children	472
142	Designing a Smart Wearable System with an Armband for Wireless Power Transfer to Implantable Medical Devices	474

143	Usability, User experience, and Workload of Augmented Reality vs. Paper Based instruction in Maintenance and Assembly Application	488
145	Designing a Smart Monitoring and Control System for Slope Stabilization in Arid Mountain Regions	506
146	DSP Optimization vs FPGA Performance: A Study of FIR Filter Implementations	517
148	A Review of Split Delivery Vehicle Routing Problem Using Adaptive Large Neighborhood Search	528
152	A Data-Driven MILP Approach to Minimize Transportation Costs and Emissions in Labor-Intensive Industries	540
153	A Blockchain-Integrated Framework for Secure and Efficient Container Release in the Smart Port of NEOM, Saudi Arabia	553
155	Optimization of Coffee Roasting Operations: A Case Study of Saudi Roastery	566
156	Industry 4.0 and Digital Supply Chains: A Review of Flexibility, Viability, and Antifragility	577
159	Hospital Supply Chain Management: Research Gaps and Decision Support Opportunities	590
163	Enhancing Pilgrim Services During Hajj: A Service Quality Framework Approach تحسين خدمات الحجاج خلال موسم الحج: نهج إطار جودة الخدمة	603
165	Leanness and Agility in Times of Crisis From Lean to Leagile: Operational Excellence and Supply Chain Resilience	617
174	Logistics performance in Saudi Arabia: A Case Study Using Six Sigma DMAIC, FMEA	618
175	Low-Cost, Enclosed Wire-Arc Additive Manufacturing Platform with Unified G-Code Control	620
176	A UAV Platform for Rapid, Remote Detection of Toxic Gases and Radiation in Crisis Response	622
199	Developing New Realities Beyond Traditional Boundaries: Enhancing African Renewable Energy Transition	624
207	The Mediating Role of National Culture Dimensions Between Human Capital and FDI Attraction in Chad	634
208	Semiotic Design Strategies for Industrial Engineering Firms	647
209	Analysis of the success and failure connection in the advanced access class barring for internet of thing deployment over LTE-Advanced network	653
211	Decoupling Solar Intermittency: A Performance Evaluation of a Battery-Buffered Green Hydrogen Production Unit for Sustainable Energy Systems	662
214	Impact of Casting Defects on Productivity in Sand Casting Foundries	675
218	3D Modeling and Design of a Tilt-Rotor UAV for Trajectory Optimization and Energy-Efficient Flight	682

220	Circular Supply Chain Optimization for Sustainable Packaging: Insights, Methods, and Emerging Research Directions	683
223	Quantifying the System-Level Impact of Alkaline Electrolyzer Degradation on Solar-to-Hydrogen Efficiency and Lifetime Performance	694
224	Maximizing Lifetime Value: A Techno-Economic Analysis of Degradation-Aware Operating Strategies for Solar-Powered Alkaline Electrolyzers	709
228	Sustainable Fabrication of Unmanned Aerial Vehicle (UAV) Blade using Composite PLA and Woven fabric of Date Palm Fiber (DPF)	725
229	A Scoping Review of Optimization methods for Optimizing Hybrid Renewable Energy Sources in a Developing Economy.	727
231	Six Sigma–Driven, Digitally Enabled Reduction of Early Deliveries, Delays and Failures	737
232	Design and fabrication of a safety helmet	739
233	Measuring Research Efficiency and Societal Impact of Private Universities in the UAE Using DEA	748
234	Barriers to Automation and Robotics in Construction: A Scientometric and Thematic Review.	750
257	The Possible Protective Effects of <i>Hericium erinaceus</i> (Lion's Mane Mushroom) on Autism-Like Behavioral Alterations Induced by Valproic Acid in Mice	762
259	Predictive Modelling of Vehicle Downtime Risk Using Machine Learning	763
260	Harnessing Automation and Robotics to Transform the Food and Beverage Manufacturing Industry	775
263	Bridging the Performance Gap: Transforming South African Refineries Through Global Best Practices	785
264	Eco-Design of Distribution Transformer using Natural Ester Insulation: Benefits for Renewable Integration and Sustainability	797
267	Application of Six Sigma to Optimize Manufacturing Parameters and Enhance Enzyme Stability in Glucose Test Strips	805
270	ADVANCING ENGINEERING DRAWING EDUCATION FOR DESIGN AND MANUFACTURING THROUGH THE FLIPPED CLASSROOM APPROACH: EVIDENCE FROM SAUDI FEMALE ENGINEERING STUDENTS	815
273	Aquatherm: A Smart Shower Control System for Eco-Friendly and Efficient Water Heating	826
274	Investigating Non-Oil Export Performance in Saudi Arabia: The Impact of Global Supply Chain Disruptions (2020-2025)	827
276	Determining Thermal Conductivity of Najran Granite Using the Single-Plate Method	828
277	Job Shop Scheduling Optimization Through Dispatching Rules and Genetic Algorithms	835

279	Impact of Post Weld Heat Treatment on Structural and Mechanical Properties of Dissimilar High Strength Steels	836
282	Determining the Uncertainty of the Mean-Time-To-Failure via Nonlinear Regression Estimation	849
283	Smart Waste Segregation Using Scalable AI Models: Advancing the Vision of Sustainable Cities	862
286	Green Ammonia and Hydrogen: Pathways to a Sustainable Energy Future-The Role of Transportation, Logistics, and Trading	863
289	Factors Affecting Job-Hopping and its Impact on Career Growth and Job Performance among Millennials and Gen-Z Professionals	873
290	Factors Affecting Graduates' Intent to Use TikTok as an Alternative to Corporate Employment	885
291	Optimizing FLW Risk Mitigation Strategies in Chili Pepper Supply Chains using Fuzzy-ANP	898
292	AI-Driven EMS Optimization: Smart Routing and IoT-Based Patient Monitoring	901
296	Geothermal exploration by utilizing slim hole drilling systems - Cost and GHG emission reductions	911
299	Development of Sustainable Occupational Safety and Health Programs in the Petroleum Sector Using Quality Control Techniques	912
300	E-Learning Management Model to Improve the Productivity of the Induction and Training Process Through 5's, Work Breakdown Structure and Scrum in a Service Company	923
302	Facility Layout Optimization using GA-Simulation & Real factory [X]	936
304	Drone Delivery in Saudi Arabia: Public Awareness and Challenges	949
305	Integrated System toward Sustainable Recycling of Pharmaceutical Waste Blister Packages	950
306	Survey-Based Evaluation of Industry 4.0 Adoption and Industry 5.0 Transition Capability in Saudi Arabia	963
307	A Hybrid LSTM-XGBoost Approach with SHAP Explainability Using the NASAC-MAPSS	976
309	Vulnerability-based Optimal Selection of Quantum-secured Links for Resilient and Energy-Efficient Smart Grids	991
310	Mechanical Characterisation of Nano-Hydroxyapatite Reinforced PLA Composites Prepared by Dry Blending for Biomedical Applications	1000
312	Application of Cognitive Logistic Networks for Route Optimization in Oman's Logistics Operations	1011
313	Experimental Analysis of Human Dexterity Using the Purdue Pegboard Test	1020
314	Machine Learning-Based Optimization of Officer Assignment and Inspection Time in Vehicle Entry Process	1022

315	Evaluating Azure Pronunciation Assessment for Mispronunciation Detection in Children Learning Arabic	1023
316	Assessment and Forecasting of Afforestation Efforts in Saudi Arabia Using Remote Sensing and Machine Learning	1036
318	Impact of AI on Industrial Engineering: A Systematic Literature Review (SLR) of Peer-Reviewed Articles and Conference Proceedings	1044
319	A Multi-Criteria Car Evaluation Method with User-Relevant Comfort Measures	1058
321	High Strain Rate Compressive Behaviour of Additively Manufactured Nylon 12	1070
323	Community Engagement and Participation in Sustainable Real Estate Development	1078
327	The Role of Digital Twins in Supplier Selection Criteria: Review and Research Directions	1087
328	Designing Trust: A Human-Centered Communication Model for Autonomous Vehicle Adoption in Saudi Arabia	1097
341	Yaqeen: An AI-Powered Islamic Companion Mobile Application for Personalized Islamic Guidance	1105
345	Critical Success Factors and Barriers in Applying Supply Chain Risk Management: A Case Study of the South African Railway Industry	1112
347	Design and fabrication of Eco-Pulse Engine Components Cleaning System: An Eco-Friendly Electrolysis Based Technology Using Non-Toxic Chemicals	1124
352	Sustainable Data Centers for Smart Cities: Optimized Energy Operation through AI-based Algorithms and Renewables	1125
353	Enhancing Environmental Efficiency in Industrial Facilities Through a Multi-Dimensional ISO 14001- Based Methodology	1128
354	CROWD MANAGEMENT IN RELIGIOUS GATHERING-SYSTEMS DESIGN APPROACH	1129
367	Smart Vehicle Glazing Using W-Doped VO ₂ and TiO ₂ for Sunlight-Responsive Tinting	1140
369	Renewable Energy Transition and CO ₂ Emissions Reduction: A Multivariate Analysis of Fiji's Energy Sector with Policy Implications	1151
370	A Novel Trimmed Mean Absolute Deviated Local Ternary Patterns for Sports Video Summarization	1163
371	Pilgrim's Concern in Hajj- A Pilot Study and Initial Results	1173
372	Electrifying Saudi Logistics: A TCO and Risk Based Roadmap for Battery Electric Truck Fleets under Vision 2030	1193
373	Green Hydrogen Supply Chain Network Design for Saudi Arabia's Energy Transition under Vision 2030	1195
375	ReLU-EfficientNet: A Robust Deep Learning Framework for Copy-Move Forgery Detection	1197

376	Financial Risk Cascades in Mega-Projects with Structural Equation Modeling: Payment Delays, Insolvency, and Project Failure in Saudi Hotel Construction	1209
378	Model for Customer Relationship Management Based on User Experience in Servuction Systems: Case Study of Prepaid Medicine	1220
379	Real-time Livestock Tracking and Alerting Method for Proactive Warning System	1234
384	From Compliance to Strategic Impact: Rethinking Strategic Planning for Chambers of Commerce and Industry in Türkiye	1244
385	Building a Resilient Semiconductor Supply Chain: A Stress Testing Framework	1246
387	Study of the Accessibility for Students with Disabilities to Faculty of Engineering Buildings at University of Tabuk	1259
388	Design and Characterisation of PLA-Based Biocomposite Filaments Reinforced with Pecan Shell for 3D Printing	1269
399	The Role of AI in Fashion : A Review of Design, Sustainability and Retail Applications	1285
400	Renewable Energy and Sustainability in Africa: A Review with Insights from the South African Energy Transition	1295
401	Entrepreneurship and Innovation in the Energy Sector	1310
403	AI-Enabled Education for Sustainable Development: Framework Integration and Contextualization in Vietnam	1319
405	Enhancing Security in Smart Home/Office Automation Systems Using Smart Contract and Facial Recognition	1328
416	Machine Learning Approach for the Prediction of Structural and Ferroelectric Properties of Two-Dimensional (2D) Halide Perovskite Materials	1345
417	Integrating Value Stream Mapping with Industry 4.0 Technologies for Continuous Monitoring and Control: A Literature Review	1347
424	Multi-Objective Optimization of a Low-Cost Solar Desalination System for Sustainable Operations	1361
426	Real-Time Face Detection Using YOLOv5 for Low-Resource CCTV Surveillance Systems	1374
427	Occupational Risk Prevention Model in the Production Area of a Peruvian Metalworking SME to Reduce Workplace Accidents	1376
433	Office Ergonomics and Human Comfort in the Arab Region - Challenges and Solutions	1390
436	Impact of Plant Layout on Material Flow: Saudi Industrial Case Studies	1398
437	Educational Infrastructure Prioritization using An Intuitionistic Fuzzy AHP Approach	1407
440	Real-Time Sodium-Ion Battery Data Analysis through a Digital Twin Model for Predicting Thermal and Chemical Degradation	1417

441	Optimizing Construction and Demolition Waste Allocation in Riyadh: A Linear Programming Approach to Support Landfill Diversion Targets	1418
446	Forecasting Sales for a Local Restaurant in Jeddah: A Time Series Approach	1434
447	Rapid Two-Sigma Screening for Supply Chain Misinformation Resilience	1442
461	AN OPTIMIZATION MODEL AND MULTI-STAGE SOLUTION APPROACH FOR THE SCHEDULING OF READY-MIX CONCRETE PRODUCTION AND DISTRIBUTION	1449
462	Integrating Value Stream Mapping, Simulation, and Layout Optimization to Improve Emergency Department Performance in Private Hospitals	1451
463	Impact of Working Conditions on Administrative Efficiency of Skyline University, Nigeria	1464
464	Camera-Based Gait Analysis using a Machine Learning Approach to Improve Patient Care	1473
477	Identify Quality Risk Management Fundamentals for Superior Pharmaceutical Industry Experience	1474
478	Inventory Control Decision Support System Under Stochastic Demand: A Case Study of a Retail Warehouse	1485
479	Fully Autonomous Swimmer Rescue System Using INS-Enabled Smart Goggles and a Self-Navigating Marine Rescue Boat	1498
481	Adaptive Control of a Quadcopter UAV Under Actuator Fault	1505
483	Enhancing Engineering Students' Soft Skills Through Project-Based Learning: Al-Maarefa University Survey	1518
484	AI-Driven Comparative Forecasting of Solar Irradiance and Temperature for Sustainable Energy Planning in Saudi Arabia	1525
485	Policy Scenarios in the System Dynamics Model of Indonesia's Sugar Supply and Demand for the National Food Self-Sufficiency Strategy	1534
486	IMPROVEMENT OF OTD IN A COMMERCIAL DISTRIBUTION CENTER APPLYING POKA YOKE, WORK STANDARDIZATION AND FORECAST	1545
487	Predictive Maintenance Using Machine Learning Model and Sensor Data Analysis	1552
488	Circular Manufacturing in Saudi Arabia and the MENA Region: An Industrial Systems Engineering Framework for Unlocking Circular Economy Climate Potential	1561
491	Simulation-Based Performance Optimization of a Respiratory System via PID and FOPID Controllers	1570
497	GWO-Based Optimization of Cascade PID Parameters for Antenna Azimuth Tracking	1580
498	Ergonomic Risk Reduction in Poultry SME Workstations: A Peruvian Case Study with a Lean-SLP Integrated Redesign Model	1593

499	Management Model Applying Lean Manufacturing Tools to Increase the OEE Index in a Plastics Industry Company	1614
500	Encouraging Public Participation: Insights from Indonesian Solar EPC Managers on Increasing Citizen Engagement in Community Energy Storage	1626
503	Cybersecurity Risk Assessment for Digital Twins: AHP-TOPSIS Ranking of Critical DoS Attack Factors	1635
504	Scaling What Works: Evidence-Based Phase Transitions for Digital Technologies in Healthcare Supply Chains (PRISM-HSC)	1647
505	A Review of Injury Risk Curve Development to Support Human Factors and Ergonomic Design under Extreme Loading Conditions	1657
506	Evaluating 5S Implementation Across Industrial Environments with Different Automation Levels - A Comparative Case Study	1669
509	Applying 5S and Standardized Work to Improve Productivity in a Food Production SME in Peru	1670
510	Fusion-Based Sensor Data Processing and Visualization Framework for Autonomous Vehicle Testing in GCC Terrains	1680
511	Deep learning driven predictive maintenance for enhanced monitoring of pantograph catenary system	1699
522	Improving Export Competitiveness in the Peruvian Fisheries Sector through a Standardized Operational Management Model	1708
523	An Integrated Framework Using DMAIC, SERVQUAL, Simulation, and MOC to Reduce Waiting Time in Healthcare Systems	1719
536	RawtoReady: A Web-Based Automated Tool for Data Cleaning and Preparation	1737
542	Intelligent Manufacturing Execution system: Making Real time decision a reality	1750
543	How AI Transforms Automotive Manufacturing, Assembly, and Design	1768
